An Essay on the Shaking Palsy James Parkinson, 1817 [An Essay on the Shaking Palsy](#) James Parkinson, 2016-08-17

James Parkinson 1755-1824 was an English surgeon, apothecary, geologist, palaeontologist and political activist. He is most famous for his 1817 work *Shaking Palsy*, in which he was the first to describe paralysis agitans, a condition that would later be renamed Parkinson's disease by Jean Martin Charcot.

Dr A D Morris had a long interest in and great familiarity with the life and times of James Parkinson 1755-1824. He was an avid collector of material related to Parkinson, some of which he communicated to medical and historical groups and which he also incorporated into publications, especially his admirable work *The Hoxton Madhouses*. When Dr Morris died in 1980, he left behind a large typescript devoted to Parkinson's life. It was single-minded in its dedication to primary texts, quoting liberally from the whole range of Parkinson's writings. This was particularly valuable since so many of Parkinson's publications were tracts, pamphlets, or occasional pieces which are now very scarce. A copy of the entire manuscript has been deposited in the Library of the Wellcome Institute for the History of Medicine in London, where it may be consulted. The length of the manuscript made publication of the whole impossible, especially since it would have had to include the facsimile reproduction of Morris's *The Hoxton Madhouses*.
