Essays In Decision Making A Volume In Honour Of Stanley Zionts:

Essays In Decision Making Mark Mark, Jaap Spronk, Jyrki Wallenius, 2012-12-06 The pioneering study by Bowman 1980 reawakened interest in risk and return relations in the strategic management literature We do not examine this literature here because we have elsewhere reviewed it in detail 1 and because for the most part these studies have been confined to ex post data Discussions of the strategies which subjects used to direct their ex ante evaluations of risks and returns have either been omitted or else have been only indirectly inferred from ex post data In addition with few exceptions this literature does not attempt to ascertain the meanings that might have been assigned by subjects to terms like risk and or the returns with which they have been concerned Even fewer of these studies have attempted to ascertain how the subjects implemented their definitions en of prospective strategies Thus this literature may route to arriving at evaluations best be regarded as bearing only indirect relations to the present study which is concerned not only with the meanings assigned to terms like risk and return but also with how these terms are used in arriving at risk and return evaluations of proposed strategies as well as how they are measured and used on an ex ante basis en route to seeing how these evaluations match with ex post performance In a sense one part of this study i e **Multiple Criteria Decision Analysis** Salvatore Greco, Matthias Ehrgott, José Rui Figueira, 2016-02-18 In two volumes this new edition presents the state of the art in Multiple Criteria Decision Analysis MCDA Reflecting the explosive growth in the field seen during the last several years the editors not only present surveys of the foundations of MCDA but look as well at many new areas and new applications Individual chapter authors are among the most prestigious names in MCDA research and combined their chapters bring the field completely up to date Part I of the book considers the history and current state of MCDA with surveys that cover the early history of MCDA and an overview that discusses the pre theoretical assumptions of MCDA Part II then presents the foundations of MCDA with individual chapters that provide a very exhaustive review of preference modeling along with a chapter devoted to the axiomatic basis of the different models that multiple criteria preferences Part III looks at outranking methods with three chapters that consider the ELECTRE methods PROMETHEE methods and a look at the rich literature of other outranking methods Part IV on Multiattribute Utility and Value Theories MAUT presents chapters on the fundamentals of this approach the very well known UTA methods the Analytic Hierarchy Process AHP and its more recent extension the Analytic Network Process ANP as well as a chapter on MACBETH Measuring Attractiveness by a Categorical Based Evaluation Technique Part V looks at Non Classical MCDA Approaches with chapters on risk and uncertainty in MCDA the decision rule approach to MCDA the fuzzy integral approach the verbal decision methods and a tentative assessment of the role of fuzzy sets in decision analysis Part VI on Multiobjective Optimization contains chapters on recent developments of vector and set optimization the state of the art in continuous multiobjective programming multiobjective combinatorial optimization fuzzy multicriteria optimization a review of the field of goal programming interactive methods for solving multiobjective

optimization problems and relationships between MCDA and evolutionary multiobjective optimization EMO Part VII on Applications selects some of the most significant areas including contributions of MCDA in finance energy planning problems telecommunication network planning and design sustainable development and portfolio analysis Finally Part VIII on MCDM software presents well known MCDA software packages **Big Data Analytics Using Multiple Criteria**

Decision-Making Models Ramakrishnan Ramanathan, Muthu Mathirajan, A. Ravi Ravindran, 2017-07-12 Multiple Criteria Decision Making MCDM is a subfield of Operations Research dealing with decision making problems A decision making problem is characterized by the need to choose one or a few among a number of alternatives The field of MCDM assumes special importance in this era of Big Data and Business Analytics In this volume the focus will be on modelling based tools for Business Analytics BA with exclusive focus on the sub field of MCDM within the domain of operations research The book will include an Introduction to Big Data and Business Analytics and challenges and opportunities for developing MCDM models in the era of Big Data **Nonlinear Multiobjective Optimization** Kaisa Miettinen, 2012-12-06 Problems with multiple objectives and criteria are generally known as multiple criteria optimization or multiple criteria decision making MCDM problems So far these types of problems have typically been modelled and solved by means of linear programming However many real life phenomena are of a nonlinear nature which is why we need tools for nonlinear programming capable of handling several conflicting or incommensurable objectives In this case methods of traditional single objective optimization and linear programming are not enough we need new ways of thinking new concepts and new methods nonlinear multiobjective optimization Nonlinear Multiobjective Optimization provides an extensive up to date self contained and consistent survey review of the literature and of the state of the art on nonlinear deterministic multiobjective optimization its methods its theory and its background The amount of literature on multiobjective optimization is immense The treatment in this book is based on approximately 1500 publications in English printed mainly after the year 1980 Problems related to real life applications often contain irregularities and nonsmoothnesses The treatment of nondifferentiable multiobjective optimization in the literature is rather rare For this reason this book contains material about the possibilities background theory and methods of nondifferentiable multiobjective optimization as well This book is intended for both researchers and students in the areas of applied mathematics engineering economics operations research and management science it is meant for both professionals and practitioners in many different fields of application The intention has been to provide a consistent summary that may help in selecting an appropriate method for the problem to be solved It is hoped the extensive bibliography will be of value to researchers **Knowledge Incorporation in Evolutionary Computation** Yaochu Jin, 2013-04-22 Incorporation of a priori knowledge such as expert knowledge meta heuristics and human preferences as well as domain knowledge acquired during evolutionary search into evolutionary algorithms has received increasing interest in the recent years It has been shown from various motivations that knowledge incorporation into evolutionary search is able to significantly improve

search efficiency However results on knowledge incorporation in evolutionary computation have been scattered in a wide range of research areas and a systematic handling of this important topic in evolutionary computation still lacks This edited book is a first attempt to put together the state of art and recent advances on knowledge incorporation in evolutionary computation within a unified framework Existing methods for knowledge incorporation are divided into the following five categories according to the functionality of the incorporated knowledge in the evolutionary algorithms 1 Knowledge incorporation in representation population initialization combination and mutation 2 Knowledge incorporation in selection and reproduction 3 Knowledge incorporation in fitness evaluations 4 Knowledge incorporation through life time learning and human computer interactions 5 Incorporation of human preferences in multi objective evolutionary computation The intended readers of this book are graduate students researchers and practitioners in all fields of science and engineering who are interested in evolutionary computation The book is divided into six parts Part I contains one introductory chapter titled A selected introduction to evolutionary computation by Yao which presents a concise but insightful introduction to evolutionary computation

Multicriterion Decision in Management Jean-Charles Pomerol, Sergio Barba-Romero, 2012-12-06

Multicriterion Decision in Management Principles and Practice is the first multicriterion analysis book devoted exclusively to discrete multicriterion decision making Typically multicriterion analysis is used in two distinct frameworks Firstly there is multiple criteria linear programming which is an extension of the results of linear programming and its associated algorithms Secondly there is discrete multicriterion decision making which is concerned with choices among a finite number of possible alternatives such as projects investments decisions etc This is the focus of this book The book concentrates on the basic principles in the domain of discrete multicriterion analysis and examines each of these principles in terms of their properties and their implications In multicriterion decision analysis any optimum in the strict sense of the term does not exist Rather multicriterion decision making utilizes tools methods and thinking to examine several solutions each having their advantages and disadvantages depending on one's point of view Actually various methods exist for reaching a good choice in a multicriterion setting and even a complete ranking of the alternatives The book describes and compares these methods so called aggregation methods with their advantages and their shortcomings Clearly organizations are becoming more complex and it is becoming harder and harder to disregard complexity of points of view motivations and objectives The day of the single objective profit social environment etc is over and the wishes of all those involved in all their diversity must be taken into account To do this a basic knowledge of multicriterion decision analysis is necessary The objective of this book is to supply that knowledge and enable it to be applied The book is intended for use by practitioners managers consultants researchers and students in engineering and business
