Essentials Of Global Mental Health:

Essentials of Global Mental Health Samuel O. Okpaku, 2014-02-27 Mental illness accounts directly for 14% of the global burden of disease and significantly more indirectly and recent reports recognise the need to expand and improve mental health delivery on a global basis especially in low and middle income countries. This text defines an approach to mental healthcare focused on the provision of evidence based cost effective treatments founded on the principles of sharing the best information about common problems and achieving international equity in coverage options and outcomes. The coverage spans a diverse range of topics and defines five priority areas for the field. These embrace the domains of global advocacy, systems of development research, progress, capacity building and monitoring. The book concludes by defining the steps to achieving equality of care globally. This is essential reading for policy makers, administrators, economists and mental health care professionals and those from the allied professions of sociology, anthropology, international politics and foreign policy.

Innovations in Global Mental Health Samuel Okpaku, 2026-12-13 This book is a fully updated and expanded edition that adds results, experiences and lessons learned since the first edition was published. Various articles and books have been published on global mental health but few of them thoroughly cover the clinical research, innovation and social implications as they pertain to psychiatry. Often, only one of these aspects is covered. A comprehensive text that can keep pace with the rapidly evolving literature grows more and more valuable each day as clinicians struggle to piece together the changes around the world that leave open the possibility for improved outcomes in care. This edition builds on the first to answer this need. Since the first edition was published, the complex field of global mental health has expanded. Institutions, NGOs, states and countries have participated in bilateral and other arrangements within the global space. During this period, the world witnessed a dramatic and significant pandemic, COVID-19. In the previous edition, many of the contributors gave examples of projects and research in their infancy. Therefore, this volume provides information based on the experiences of the last four years. The contributors review their previous experiences, provide results and express the lessons they have learned since the initiation of their studies or interventions. New topics covered in this edition include, amongst others, psychedelics, stigma and disability, climate change and environmentalism, immigration and refugee problems, and artificial intelligence. **Innovations in Global Mental Health Second Edition** is the ultimate resource for psychiatrists, psychologists, primary care physicians, hospitalists, policy makers and all medical professionals at the forefront of global mental health and its implications for the future.
