

A movie poster for 'Alien Invasion'. The top half features a large, dark, metallic alien head with a textured, ribbed surface, looking down. Below it, a man with long brown hair is shown from the chest up, screaming with his eyes closed and hands covering his face. The background is a misty, forested landscape. The text 'WE DO NOT COME IN PEACE' is in the top right, and 'ALIEN INVASION' is at the bottom in large, green, stylized letters.

[Invasive Birds](#) Colleen T. Downs, Lorinda A. Hart, 2020-12-07 Examining globally invasive alien birds, the first part of this book provides an account of 32 global avian invasive species as listed by the Invasive Species Specialist Group (ISSG). It acts as a one-stop reference volume; it assesses current invasive status for each bird species, including details of physical description, diet, introduction and invasion pathways, breeding behaviour, natural habitat. It also looks at the environmental impact of each species, as well as current and future control methods. Full-colour photographs assist with species identification and global distribution maps give a visual representation of the current known distributions of these species. The second part of the book discusses the biogeographical aspects of avian invasions, highlighting current and emerging invasive species across different regions of the world. The third section considers the impact of invasive species on native communities, problems associated with invasive bird management and the use of citizen science in the study of invasive birds

[Encyclopedia of the Anthropocene](#), 2017-11-27 Encyclopedia of the Anthropocene Five Volume Set presents a currency-based global synthesis cataloguing the impact of humanity's global ecological footprint. Covering a multitude of aspects related to Climate Change, Biodiversity, Contaminants, Geological Energy and Ethics, leading scientists provide foundational essays that enable researchers to define and scrutinize information, ideas, relationships, meanings and ideas within the Anthropocene concept. Questions widely debated among scientists, humanists, conservationists, politicians and others are included, providing discussion on when the Anthropocene began, what to call it, whether it should be considered an official geological epoch, whether it can be contained in time and how it will affect future generations. Although the idea that humanity has driven the planet into a new geological epoch has been around since the dawn of the 20th century, the term Anthropocene was only first used by ecologist Eugene Stoermer in the 1980s and hence popularized in its current meaning by atmospheric chemist Paul Crutzen in 2000. Presents comprehensive and systematic coverage of topics related to the Anthropocene with a focus on the Geosciences and Environmental science. Includes point-counterpoint articles debating key aspects of the Anthropocene, giving users an even-handed navigation of this complex area. Provides historic seminal papers and essays from leading scientists and philosophers who demonstrate changes in the Anthropocene concept over time
