immigration is used to stir up insecurity Why we are frightened by distant wars How corruption corrodes care What we should really be worried about when it comes to climate change including what the scientists get wrong about people's fears And finally how the great unknown unknowns dictate the way we think about the future and what we should be less afraid of pandemics asteroids tsunamis even each other The Next Crisis uses the most up to date research to redraw our assumptions about where our greatest threats come from Dorling offers a series of solutions for tackling or at the very least coming to terms with our uncertain future
