*Capital Fictions* Ericka Beckman,2013 Between 1870 and 1930 Latin American countries were incorporated into global capitalist networks like never before mainly as exporters of raw materials and importers of manufactured goods During this Export Age entire regions were given over to the cultivation of export commodities such as coffee and bananas capital and labor were relocated to new production centers and barriers to foreign investment were removed Capital Fictions investigates the key role played by literature in imagining and interpreting the rapid transformations unleashed by Latin America s first major [Ecological Crisis and Cultural Representation in Latin America](#) Mark Anderson,Zélia M.

Bora,2016-10-04 Worldwide environmental crisis has become increasingly visible over the last few decades as the full scope of anthropogenic climate change manifests itself and large scale natural resource extraction has expanded into formerly remote areas that seemed beyond the reach of industrialization Scientists and popular culture alike have turned to the term Anthropocene to capture the global scale of environmental and even geological transformations that humans have carried out over the last two centuries The chapters in Ecological Crisis and Cultural Representation in Latin America examine the dynamics and interplay between local cultures and the expansion of global capitalism in Latin America emphasizing the role of art in bearing witness to and generating awareness of environmental and social crises but also its possibilities for formulating solutions They take particular care to draw out the ways in which local environmental crises in Latin American nations are witnessed and imagined as part of a global system focusing on the problems of time scale and complexity as key terms in conceiving the dimensions of crisis At the same time they question the notion of the Anthropocene as a species wide human historical project making visible the coloniality of natural resource extraction in Latin America and its dire effects for local people cultures and environments Taking an ecocritical approach to Latin American cultural production including literature film performance and digital artwork the chapters in this volume develop a notion of ecological crisis that captures not only its documentary sense in the representation of environmental destruction the degradation of the oikos but also the crisis in the modern worldview logos that the acknowledgment of crisis provokes In this sense crisis is also the promise of a turning point of the possibilities for change Latin American representations of ecological crisis thus create the conditions for projects that decolonize environments developing new sustainable ways of conceiving of and relating to our world or returning to old ones [New Approaches to Latin American Studies](#) Juan Poblete,2025-05-30 New Approaches to Latin American Studies Culture and Power Vol 2 provides an examination of the new and defining approaches that have emerged in the field of Latin American Studies in the last decade since 2014 Like its predecessor this second volume of New Approaches to Latin American Studies is organized using the concept of a turn as in linguistic or cultural turn and aims to help both students and faculty in an eminently interdisciplinary space like Latin American Studies find new ways of conceptualizing objects and research Original contributions from experts in their fields provide a discussion that is not meant

to be fully comprehensive but concentrates instead on key authors and key texts In each chapter the keyword that defines the turn functions as a specific limit that contains the proliferation of references and connections restricting them to the trajectory of such turn This second volume includes 11 new chapters covering important transformations during the last decade on the issues perspectives and stakes of the field This book is an expert produced reliable and reader friendly orientation to the many new areas of research Latin American Studies now encompasses and evidence of the dynamism of this complex field

[Narcocultura de norte a sur](#) Ainhoa Vásquez Mejías,2017 Narcocultura de norte a sur es un libro con miradas interdisciplinarias e internacionales en el tema del

narcotráfico Los comienzos en el narcocorrido las influencias de Hollywood en la narcoliteratura la transnacionalización de una industria que se ha expandido desde el Cono Sur a Norteamérica el rol que han asumido los intelectuales frente a esta problemática y el boom de las narcoseries producidas en Estados Unidos son algunas de las líneas que se abordan. Este libro no pretende otorgar respuestas ni soluciones sino abrir el debate frente a las complejas aristas de un negocio que ha implicado tanto en lo social como en lo cultural a niños y jóvenes mujeres a la población mexicana y actualmente a casi todo el continente americano. Estamos frente a un texto clave para los investigadores del rubro pero también lo es para todo aquel que quiera adentrarse en este fenómeno cultural que recién está comenzando.
