**‘The second edition of this popular publication provides a thorough and comprehensive guide to issues surrounding the care of cardiac patients. Written in a style suitable both for the novice and the experienced practitioner alike, it provides, through the use of relevant illustrations, photographs and related case-studies, an up-to-date and logical approach to all aspects of modern cardiac nursing.**

**References are thorough and current, research quoted is contemporary and all topical cardiac issues are dealt with in-depth, discussing their impact on both service users and providers. A wide variety of areas are covered from epidemiology and anatomy and physiology to assessment of the cardiac patient and practical considerations of their care. It concludes with a vision of cardiac nursing in the near future.**

**This volume would be entirely suited to cardiac surgery nursing, CCU and general cardiology/ catheter lab settings, and would prove useful for anyone studying in those settings.**

**My only personal hesitancy in buying it would be the price, but if I was in the market for an ideal reference text which would cover all aspects of cardiac nursing, then I have yet to see a better produced book than this.**
