Capital One Judgement:

Marx's 'Grundrisse' and Hegel's 'Logic' (RLE Marxism) Hiroshi Uchida, 2015-04-17 Marx's Grundrisse is acknowledged as the vital link between Marx's early and late work. It is also a crucial text in elucidating Marx's debt to the idealist philosopher G. W. F. Hegel. This book, first published in 1988, is the first full-length study of that relationship in a thorough textual analysis which makes the connections explicit and also the Grundrisse's relations to the works of Adam Smith and Aristotle. This book argues that Marx's critique of political economy and his critique of Hegel are double interrelated. Not only did Marx adapt Hegelian logic in order to analyse the economic categories crucial to modern society but it is argued that those logical categories were themselves seen as reflections of the productive processes of contemporary commercial society. Uchida reveals a conceptual structure common to the apparently rarefied world of Hegelian conceptual logic and to the supposedly common sensical world of economic science. Demonstrating this is a considerable achievement and it allows us to consider precisely what is valuable today in Marx's critical commentary on this conceptual structure and on the type of society in which it is manifested. Uchida's subject like Marx's is the force of capital on modern life.

Time for the Ancients P. N. Singer, 2022-01-19. The book presents the author's latest research on ancient perceptions of time; it centres on medical discussions especially of the doctor/philosopher Galen while also contextualizing his work within Graeco-Roman evidence and discussions archaeological, medical, technological, philosophical, literary more broadly. The focus is on questions of medical or experiential significance: life cycles, disease cycles, daily regimes for mind and body, clinical assessment including the vital area of diagnosis through the pulse, technologies of time measurement. But the philosophical background is also examined: questions of the nature and definition of time and its relationship to space and motion. Galen offers original contributions in all these areas at the same time as shedding important light on both contemporary attitudes and previous discussions. The book thus offers an accessible and vivid overview of key issues in ancient time perception and awareness while also offering the first in-depth exploration of the insights that the Galenic texts add to this picture. Five thematic chapters: Time Measurement, Year and Life Cycles, Biography, Medical Cycles.
