**Making Sense of Media and Politics** Gadi Wolfsfeld, 2022-03-17 In Making Sense of Media and Politics Gadi Wolfsfeld introduces readers to the most important concepts for examining the interrelationship of media and politics. Five major principles are used to summarize the major arguments. Political power can usually be translated into power over all forms of media. When the powerful lose control over the political environment they also lose control over all forms of media. Every political story that appears in every form of media is biased. All forms of media are primarily dedicated to telling good stories which can have a major impact on political processes. Many of the most important effects of the various forms of media on citizens tend to be unintentional and unnoticed. By identifying these five key principles of political communication Wolfsfeld examines those who package and send political messages those who transform political messages into stories and the effects this can have on citizens and how the more active members of the public users can initiate their own stories. The result is a brief engaging guide to help make sense of the wider world of media and politics and an essential companion to more in depths studies of the field. New to the Second Edition Up to date coverage of major political events in the last decade including the landmark US elections of 2016 and 2020. Devotes more attention to the hybrid media system that has developed over the last decade providing a greater balance between traditional news and social media in particular. Includes more cross national research especially in non Western and non democratic countries. Refines the five principles of political communication to better reflect contemporary media trends. Covers key emerging topics including misinformation and threats to democratic institutions new forms of political engagement and the economic base of the various forms of media.

**Patient Zero and the Making of the AIDS Epidemic** Richard A. McKay,2017-11-22 Now an award winning documentary feature film The search for a patient zero popularly understood to be the first person infected in an epidemic has been key to media coverage of major infectious disease outbreaks for more than three decades Yet the term itself did not exist before the emergence of the HIV AIDS epidemic in the 1980s How did this idea so swiftly come to exert such a strong grip on the scientific media and popular consciousness In **Patient Zero** Richard A McKay interprets a wealth of archival sources and interviews to demonstrate how this seemingly new concept drew upon centuries old ideas and fears about contagion and social disorder McKay presents a carefully documented and sensitively written account of the life of Ga tan Dugas a gay man whose skin cancer diagnosis in 1980 took on very different meanings as the HIV AIDS epidemic developed and who received widespread posthumous infamy when he was incorrectly identified as patient zero of the North American outbreak McKay shows how investigators from the US Centers for Disease Control inadvertently created the term amid their early research into the emerging health crisis how an ambitious journalist dramatically amplified the idea in his determination to reframe national debates about AIDS and how many individuals grappled with the notion of patient zero adopting challenging and redirecting
