

# 300 creative writing prompts for kids

Imagine a giant box is delivered to your front doorstep with your name on it. What's inside and what happens when you open it?

Write a short story about what it might be like if you woke up one morning with a mermaid tail.

Write about what would it be like if you had an alligator as a pet.

If you were in charge of the whole world, what would you do to make the world a happier place?

Imagine that dogs take over the world. What do they make the humans do?

Write about 3 places you would like to travel someday. What do these three places have in common?

Write a poem that starts with the word "if".

How do you feel when someone takes something of yours without asking? What is a good way to deal with it when that happens?

Imagine you walk out your front door one morning and it is raining popcorn! What do you do?

 Touch screen tablets have greatly expanded the technology accessible to preschoolers toddlers and even infants given that  
 they do not require the fine motor skills required for using traditional computers Many parents and educators wish to make  
 evidence based decisions regarding young children s technology use yet technological advancements continue to occur faster  
 than researchers can keep up with Accordingly despite touch screen tablets entering society more than 5 years ago we are in  
 the infancy of research concerning interactive media and children The topic has gained traction in the past couple of years  
 For example theoretical papers have discussed how interactive media activities differ from physical toys and passive media  
 Christakis 2014 and how educational apps development should utilise the four pillars of learning Hirsh Pasek et al 2015 Yet  
 there has been little experimental research published on young children and touch screen use      **Creative Reading for**
