Stem For Kids 2026 Guide:

Handbook of Research on Equity in Computer Science in P-16 Education Keengwe, Jared, Tran, Yune, 2020-11-13

The growing trend for high quality computer science in school curricula has drawn recent attention in classrooms. With an increasingly information based and global society computer science education coupled with computational thinking has become an integral part of an experience for all students given that these foundational concepts and skills intersect cross disciplinarily with a set of mental competencies that are relevant in their daily lives and work. While many agree that these concepts should be taught in schools there are systematic inequities that exist to prevent students from accessing related computer science skills. The Handbook of Research on Equity in Computer Science in P-16 Education is a comprehensive reference book that highlights relevant issues, perspectives, and challenges in P-16 environments that relate to the inequities that students face in accessing computer science or computational thinking and examines methods for challenging these inequities in hopes of allowing all students equal opportunities for learning these skills. Additionally, it explores the challenges and policies that are created to limit access and thus reinforce systems of power and privilege. The chapters highlight issues, perspectives, and challenges faced in P-16 environments that include gender and racial imbalances, population of growing computer science teachers who are predominantly white and male, teacher preparation or lack of faculty expertise, professional development programs, and more. It is intended for teacher educators, K-12 teachers, high school counselors, college faculty in the computer science department, school administrators, curriculum and instructional designers, directors of teaching and learning centers, policymakers, researchers, and students.

Primary Mathematics Penelope Baker, Rosemary Callingham, Tracey Muir, 2023-09-07 Primary Mathematics Integrating Theory with Practice is a comprehensive introduction to teaching mathematics in Australian primary schools. Closely aligned with the Australian Curriculum, it provides a thorough understanding of measurement, geometry, patterns and algebra, data and statistics, and chance and probability. The fourth edition provides support for educators in key aspects of teaching, planning, assessment, digital technologies, diversity in the classroom, and integrating mathematics content with other learning areas. It also features a new chapter on the role of education support in the mathematics classroom. Each chapter has been thoroughly revised and is complemented by classroom snapshots demonstrating practical application of theories, activities to further understanding and reflection questions to guide learning. New in this edition are Concepts to consider, which provide a guided explanation and further discussion of key concepts to support pre- and in-service teachers' learning and teaching of the fundamentals of mathematics.

Optimizing Bilingual Development in Typical and Atypical Children: Language Acquisition, Use, and Interventions Dimitra V. Katsarou, Ifigeneia Dosi, 2025-08-29 Bilingual language development is a complex and dynamic process that shapes how children interact, learn, and participate in society. Understanding the factors that influence bilingual acquisition is essential for supporting both typically developing children and those with developmental differences. Research

demonstrates that bilingualism can offer significant cognitive social and academic benefits even for children with language related challenges provided they receive appropriate support In inclusive and culturally responsive environments dual language development can enhance identity promote equity and facilitate meaningful participation in diverse communities As such fostering bilingualism is not only a linguistic endeavor but also a pathway to broader societal inclusion and resilience Optimizing Bilingual Development in Typical and Atypical Children Language Acquisition Use and Interventions offers a comprehensive exploration of bilingual development across typical and atypical populations It emphasizes evidence based educational and clinical practices and provides a unified framework for understanding bilingualism as a dynamic and context dependent process Covering topics such as ADHD morphology and psychomotor development this book is an excellent resource for researchers educators clinicians policymakers and more Christian Advocate and Journal and Zion's Herald

,1905 **Research Anthology on Computational Thinking, Programming, and Robotics in the Classroom**

Management Association, Information Resources,2021-07-16 The education system is constantly growing and developing as more ways to teach and learn are implemented into the classroom Recently there has been a growing interest in teaching computational thinking with schools all over the world introducing it to the curriculum due to its ability to allow students to become proficient at problem solving using logic an essential life skill In order to provide the best education possible it is imperative that computational thinking strategies along with programming skills and the use of robotics in the classroom be implemented in order for students to achieve maximum thought processing skills and computer competencies The Research Anthology on Computational Thinking Programming and Robotics in the Classroom is an all encompassing reference book that discusses how computational thinking programming and robotics can be used in education as well as the benefits and difficulties of implementing these elements into the classroom The book includes strategies for preparing educators to teach computational thinking in the classroom as well as design techniques for incorporating these practices into various levels of school curriculum and within a variety of subjects Covering topics ranging from decomposition to robot learning this book is ideal for educators computer scientists administrators academicians students and anyone interested in learning more about how computational thinking programming and robotics can change the current education system The Christian Advocate
