Gerontological Nursing Patricia A. Tabloski, 2006 Patricia Tabloski's *Gerontological Nursing: The Essential Guide to Clinical Practice* is a comprehensive research-based text that will guide nursing students in their care of older patients. Bolstered by current research in nursing, medicine, sociology, and psychology, this book emphasizes both critical thinking and application of the nursing process to give students the confidence they need to provide the highest level of care. Key Features: The Best Practices feature reinforces specific tools, instruments, and content from each chapter and applies them to gerontological nursing. Practice Pearls provide essential tips for student success in the clinical arena. Drug Alerts offer useful information regarding the prescription dosage and administration of drugs to older persons. Case Studies present a brief clinical scenario and encourage the student to analyze assessment, diagnoses, expected outcomes, planning, and implementation, evaluation, and ethical dilemmas followed up by critical thinking questions related to the nursing process. Patient/Family Teaching Guidelines offer instructions for elder care in a question and answer format and provide corresponding rationales. **NGNA Core Curriculum for Gerontological Nursing** Ann Schmidt Luggen, National Gerontological Nursing Association, 2001 Core Curriculum for Gerontological Nursing helps nurses prepare for the American Nurses Credentialing Center (ANCC) examination for the gerontologic nurse. Content is based on the format of the certification exam, and this new revised edition closely matches the new test plan. Each topic includes learning objectives, outline, discussion, study questions, answers with rationales, and references. A new sample exam is located in the back of the book.
