Geschiedenis Der Nederlandsche Spoorwegen 1832-1938:

Geschiedenis der Nederlandsche spoorwegen 1832-1938 J. H. Jonckers Nieboer, 1938 **Institutions in the Transport and Communications Industries** Lena Andersson-Skog, Olle Krantz, 1999 **International Bibliography of Business History** Francis Goodall, Terry Gourvish, Steven Tolliday, 2013-12-16

The field of business history has changed and grown dramatically over the last few years. There is less interest in the traditional company centred approach and more concern about the wider business context. With the growth of multi national corporations in the 1980s international and inter firm comparisons have gained in importance. In addition there has been a move towards improving links with mainstream economic financial and social history through techniques and outlook. The International Bibliography of Business History brings all of the strands together and provides the user with a comprehensive guide to the literature in the field. The Bibliography is a unique volume which covers the depth and breadth of research in business history. This exhaustive volume has been compiled by a team of subject specialists from around the world under the editorship of three prestigious business historians.

Railways in the Netherlands A. J. Veenendaal, 2001. This book traces the origin, growth, decline and resurrection of the railway system of the Netherlands from its beginnings to privatization in the 1990s and places its history in the context of the political and socioeconomic development of the country. At first the largely agrarian and mercantile Dutch society saw little use for such a novel system of transportation thanks to a highly developed system of roads and waterways. However the success of early English railways did not go unnoticed and in 1834 a plan was developed for a railway from Amsterdam to the Prussian Ruhr area to replace the transportation system along the Rhine River. Although this initial plan was finally abandoned other lines were opened in 1839. The technology was largely borrowed from England and Belgium but from the outset Dutch engineers played an important role in the development of the network. Apart from a short lived state system the first railways were built and operated by private companies but when this did not result in an efficient network the state stepped in again in 1860 to bring coherence. By 1900 the national network was complete but labor unrest escalated leading to the national strike of 1903 which reverberated for many years in the Dutch Parliament, railroad board rooms and socialist political parties. The exigencies of World War I increased the grip of the state on the railways which ultimately resulted in 1938 in the complete unification of the railways albeit under public ownership. In the 1920s and 1930s competition from other forms of transportation resulted in a curtailment of services and the closing of unprofitable lines. World War II devastated the Dutch railway system and necessitated an almost complete rebuilding. In the postwar era population growth, greater mobility, pollution problems and lack of space for new highways led to an intensive use of existing railways and the construction of new lines to link new suburbs and airports with the existing network. The privatization craze of the 1990s separated the ownership of the network from its operations but the final relationship has yet to be established.

The Strictures of Inheritance Jan Luiten van Zanden, Arthur van Riel, 2021-04-13. A major feat of research and synthesis, this

book presents the first comprehensive history of the Dutch economy in the nineteenth century an important but poorly understood piece of European economic history Based on a detailed reconstruction of extensive economic data the authors account for demise of the Dutch economy s golden age After showing how institutional factors combined to make the Dutch economy a victim of its own success the book traces its subsequent emergence as a modern industrial economy Between 1780 and 1914 the Netherlands went through a double transition Its economy which in the words of Adam Smith was approaching a stationary state in the eighteenth century entered a process of modern economic growth during the middle decades of the nineteenth At the same time the country s sociopolitical structure was undergoing radical transformation as the decentralized polity of the republic gave way to a unitary state As the authors show the dramatic transformation of the Dutch political structure was intertwined with equally radical changes in the institutional structure of the economy The outcome of this dual transition was a rapidly industrializing economy on one side and on the other the neocorporatist sociopolitical structure that would characterize the Netherlands in the twentieth century Analyzing both processes with a focus on institutional change this book argues that the economic and political development of the Netherlands can be understood only in tandem

Navigating Time and Space in Population Studies Myron P Gutmann, Glenn D Deane, Emily R Merchant, Kenneth M Sylvester, 2011-02-10 Navigating Time and Space in Population Studies presents innovative approaches to long standing questions about the diffusion of population and demographic behavior across space and over time This collection utilizes newly available historical data along with spatially and temporally explicit analytical methods to evaluate and refine core demographic theories and to pose new questions about mortality and fertility transitions migration urbanization and social inequality It adds a spatial dimension to the analysis of temporal processes and a temporal element to spatial processes Chapters cover a broad range of geographical settings including the United States Europe Latin America and the Islamic world and span time periods from the eighteenth to twentieth century Contributors from a variety of disciplines reveal the complexity of factors involved in population processes that spread across space and unfold over time and demonstrate a rich set of tools with which to explore analyze and test the spatial and temporal dynamics of these phenomena The theories methods and substantive findings presented here provide new lenses through which to view time and space in population studies offering useful models and valuable insights to demographers and other social scientists exploring both historical and contemporary questions about population dynamics anywhere in the world

Geschiedenis van de Zuiderzeeverij Y. N. Ypma, 1962 **Paying for the Liberal State** José Luís Cardoso, Pedro Lains, 2010-02-08 Public finance is a major feature of the development of modern European societies and it is at the heart of the definition of the nature of political regimes Public finance is also a most relevant issue in the understanding of the constraints and possibilities of economic development This book is about the rise and development of taxation systems expenditure programs and debt regimes in Europe from the early nineteenth century to the beginning of World War I Its main purpose is to

describe and explain the process by which financial resources were raised and managed The volume presents studies of nine countries or empires that are considered highly representative of the widest European experience on the matter and discusses whether there are any common patterns in the way the different European states responded to the need for raising additional resources to pay for the new tasks they were performing *Algemene geschiedenis der Nederlanden: Van liberaal naar sociaal getij, 1885-1914* J.
