Political Power and Economic Inequality Charles F. Andrain, 2014-02-14 Political Power and Economic Inequality offers a balanced comparative analysis of worldwide income inequality Charles F Andrain explores the ways that government institutions political parties private corporations labor unions and protest movements influence public programs How do these organizations mobilize resources so that their preferences become government decisions What impact do these policies have on different geographic regions occupations ethnic religious groups and genders Drawing on comprehensive worldwide data the author highlights the similarities and differences among nations By focusing on global trends he explains the connections that link domestic conditions with foreign trade overseas investment labor migration and communications media Andrain argues that the globalization of income inequality explains contemporary political life in the United States as well as in other parts of the world To fully understand global income distribution we need to grasp how historical changes affect these trends why social movements stage protests against the growing income gap and how a comparative approach best explains income differences Andrain s tightly written interdisciplinary study stresses the impact of this problem on political life and social change in the United States Europe Asia and Latin America The comparative evidence probes the full dynamics of this controversial issue and its consequences for society as a whole

Neoliberalism, Accountability, and Reform Failures in Emerging Markets Luigi Manzetti, 2015-10-13 The agenda of neoliberal market reform known as the Washington Consensus which was meant to turn around the economies of developing and postcommunist countries and provide the bedrock of economic success on which stable democracies could be built has largely proved to be a failure with Russia and many Latin American countries like Argentina left in severe economic crisis by the end of the 1990s Some proponents of neoliberal reform such as Anne Krueger have attributed this failure to the piecemeal and incomplete implementation of reform measures while others including Nobel Prize economist and former World Bank vice president Joseph Stiglitz have pointed to technical flaws in the

policies While both of these assessments focus narrowly on economic factors Luigi Manzetti highlights the crucial importance of political institutions and processes to a fully adequate explanation His argument is that the ideology of neoliberal reform rooted in the theories of Friedrich von Hayek and Milton Friedman assumed political checks and balances that did not exist in many of these countries undergoing market reform and that only by taking political accountability as an influential variable in the equation for success can we really understand what happened Where accountability was weak patterns of corruption collusion and patronage worked to undermine the intended aims of market reform Manzetti uses both large N statistical analyses and small N case studies of Argentina Chile and Russia to provide empirical evidence for his argument

The Walls of Santiago Terri Gordon-Zolov, Eric Zolov, 2022-05-05 A photo illustrated record of Chilean protest art along with reflections on artistic antecedents global protest movements and the long shadow cast by Chile's authoritarian past From October 2019 until the COVID 19 lockdown in March 2020 Chile was convulsed by protests and political upheaval as what began as civil disobedience transformed into a vast resistance movement Throughout the most striking aspects of the protests were the murals graffiti and other political graphics that became ubiquitous in Chilean cities Authors Terri Gordon Zolov and Eric Zolov were in Santiago to witness and document the protests from their very beginning The book is beautifully illustrated with over 150 photographs taken throughout the protests Additional photos will be available on the publisher's website From the introduction In the conclusion we take stock of the crisis of the nation state in the contemporary era This chapter brings events into the present moment noting the ways President Piñera took advantage of the COVID 19 pandemic to reclaim the streets of Santiago a phenomenon echoed in countries across the globe While most of the global protest movements were forced to go underground or into the ether the Black Lives Matter movement surged in the United States and drew massive amounts of support both domestically and abroad suggesting a continued wave of grassroots protests We close with reflections on the continued relevance of walls in a virtual world the testimonial role that protest graphics play and the future outlook for revolutionary movements in Chile and worldwide

1989 and the West Eleni Braat, Pepijn Corduwener, 2019-07-15 Back in 1989 many anticipated that the end of the Cold War would usher in the end of history characterized by the victory of democracy and capitalism At the thirtieth anniversary of this momentous event this book challenges this assumption It studies the most recent era of contemporary European history in order to analyse the impact consequences and legacy of the end of the Cold War for Western Europe Bringing together leading scholars on the topic the volume answers the question of how the end of the Cold War has affected Western Europe and reveals how it accelerated and reinforced processes that shaped the fragile geo political and economic order of the continent today In four thematic sections the book analyses the changing position of Germany in Europe studies the transformation of neoliberal capitalism answers the question how Western Europe faced the geopolitical challenges after the Berlin Wall came down and investigates the crisis of representative democracy As such the book provides a comprehensive and novel historical perspective on Europe

since the late 1980s *From Economic Crisis to Reform* Grigore Pop-Eleches, 2009 The wave of neoliberal economic reforms in the developing world since the 1980s has been regarded as the result of both severe economic crises and policy pressures from global financial institutions such as the International Monetary Fund IMF Using comparative evidence from the initiation and implementation of IMF programs in Latin America and Eastern Europe *From Economic Crisis to Reform* shows that economic crises do not necessarily persuade governments to adopt IMF style economic policies Instead ideology interests and institutions at both the international and domestic levels mediate responses to such crises Grigore Pop Eleches explains that the IMF's response to economic crises reflects the changing priorities of large IMF member countries He argues that the IMF gives greater attention and favorable treatment to economic crises when they occur in economically or politically important countries The book also shows how during the neoliberal consensus of the 1990s economic crises triggered IMF style reforms from governments across the ideological spectrum and how these reforms were broadly compatible with democratic politics By contrast during the Latin American debt crisis the contentious politics of IMF programs reflected the ideological rivalries of the Cold War Economic crises triggered ideologically divergent domestic policy responses and democracy was often at odds with economic adjustment The author demonstrates that an economic crisis triggers neoliberal economic reforms only when the government and the IMF agree about the roots and severity of the crisis

From Pinochet to the 'Third Way' Marcus Taylor, 2006-06-20 This is a comprehensive analysis of three decades of neoliberal policies in Chile from the Pinochet dictatorship until today Chile is often described as a model of neoliberal development policy Marcus Taylor questions this description Examining the contradictions of neoliberalism he demonstrates how it has created a society that is deeply ridden with inequalities Taylor shows how the tensions that arose from this social inequality led to the emergence of a Third Way neoliberalism in the post dictatorship period Taylor argues that this new development paradigm has failed This is a result of the inability of Third Way neoliberalism to transform social relationships and institutions The nature of this failure affects the direction of popular movements for social change in Latin America during a time of renewed social and political upheaval **The Political Economy of Trade Reform in Emerging**
