**Child Care Problem** David M. Blau, 2001-11-09 The child care system in the United States is widely criticized yet the underlying structural problems are difficult to pin down In The Child Care Problem David M Blau sets aside the often emotional terms of the debate and applies a rigorous economic analysis to the state of the child care system in this country arriving at a surprising diagnosis of the root of the problem Blau approaches child care as a service that is bought and sold in markets addressing such questions as What kinds of child care are available Is good care really hard to find How do costs affect the services families choose Why are child care workers underpaid relative to other professions He finds that the child care market functions much better than is commonly believed The supply of providers has kept pace with the number of mothers entering the workforce and costs remain relatively modest Yet most families place a relatively low value on high quality child care and are unwilling to pay more for better care Blau sees this lack of demand rather than the market's inadequate supply as the cause of the nation's child care dilemma The Child Care Problem also faults government welfare policies which treat child care subsidies mainly as a means to increase employment of mothers but set no standards regarding the quality of child care their subsidies can purchase Blau trains an economic lens on research by child psychologists evaluating the evidence that the day care environment has a genuine impact on early development The failure of families and government to place a priority on improving such critical conditions for their children provides a compelling reason to advocate change The Child Care Problem concludes with a balanced proposal for reform Blau outlines a systematic effort to provide families of all incomes with the information they need to make more prudent decisions And he suggests specific revisions to welfare policy including both an allowance to defray the expenses of families with children and a child care voucher that is worth more when used for higher quality care The Child Care Problem provides a straightforward evaluation of the many contradictory claims about the problems with child care and lays out a reasoned blueprint for reform which will help guide both social scientists and non academics alike toward improving the quality of child care in this country

**Play and Literacy in Early Childhood** Kathleen A. Roskos, 2017-07-05 This volume brings together studies research syntheses and critical commentaries that

examine play literacy relationships from cognitive ecological and cultural perspectives The cognitive view focuses on mental processes that appear to link play and literacy activities the ecological stance examines opportunities to engage in literacy related play in specific environments and the social cultural position stresses the interface between the literacy and play cultures of home community and the school Examining play from these diverse perspectives provides a multidimensional view that deepens understanding and opens up new avenues for research and educational practice Each set of chapters is followed by a critical review by a distinguished play scholar These commentaries focus is to hold research on play and literacy up to scrutiny in terms of scientific significance methodology and utility for practice A Foreword by Margaret Meek situates these studies in the context of current trends in literacy learning and instruction Earlier studies on the role of play in early literacy acquisition provided considerable information about the types of reading and writing activities that children engage in during play and how this literacy play is affected by variables such as props peers and adults However they did not deal extensively as this book does with the functional significance of play in the literacy development of individual children This volume pushes the study of play and literacy into new areas It is indispensable reading for researchers and graduate students in the fields of early childhood education and early literacy development *Coordinated Compliance Review*
