Strategy And Defense Policy For Small States: Problems And Prospects Bernard F W Loo, 2021-11-08 For students of Strategic Studies in small countries with limited financial human and military resources the available literature on Strategic Studies in particular texts that seek to explain the key concepts and components of Strategic Studies can be very alien in its focus to the strategic conditions and issues that these countries face This book contains a collection of essays that seeks to discuss key concepts in Strategic Studies as well as contemporary challenges in strategy and defence policy from the perspective of small states It is based on the idea derived from the German philosopher of war Carl von Clausewitz that there is a distinction between logic and grammar while the field of Strategic Studies contains a number of key concepts such as geopolitics and geostrategy strategic culture arms dynamics and the phenomenon of military modernization that are universal in logic the grammar that is the specific manifestations of these concepts in the contexts of small states is necessarily different from larger more materially endowed states Related Link s [Classical Geopolitics](#) Phil Kelly, 2016-02-10 Geopolitics is the study of how the projection of power ideological cultural economic or military is effected and affected by the geographic and political landscape in which it operates Despite the real world relevance of geopolitics a common understanding of what classical geopolitics is and how it works still lies beyond the reach of both researchers and practitioners In Classical Geopolitics Phil Kelly attempts to build a common theoretical model incorporating a host of variables that reflect the complexity of the modern geopolitical stage He then analyzes thirteen pivotal but widely differing historical events stretching from the Peloponnesian War to World War II from the fall of the British and Soviet empires to the contemporary diplomacy of South America Through this analysis Kelly tests the efficacy of his model as a comprehensive geopolitical analytical tool that can be used across a broad spectrum of geopolitical contexts and events **Geopolitical Change and the Antarctic Treaty System** Shirley V. Scott, Tim Stephens, Jeffrey McGee, 2024-12-27 This book explores how geopolitical tensions have shaped the Antarctic Treaty System ATS and offers insights into managing future challenges The ATS established with the 1959 Antarctic Treaty during the Cold War has been a successful model of international governance ensuring Antarctica's peaceful use and environmental protection However the ATS now faces new pressures including an expanded membership of 57 states increased economic activities such as tourism fishing and bio prospecting and the impacts of climate change These factors are exacerbating geopolitical tensions that could challenge the stability of the ATS The book examines key moments in the history of the ATS to understand how past tensions were managed and what lessons can be drawn for the future The volume covers the creation of the CCAMLR marine conservation treaty in the late 1970s 1980s the developing world's opposition to the ATS in United Nations debates during the 1980s 1990s the shift from permitting Antarctic mining to establishing the Madrid Protocol on Environmental Protection in the early 1990s the formation of the International Association of Antarctic Tourism Operators the management of Illegal Unregulated and Unreported IUU fishing

in the 2000s and the proposals for marine protected areas under the CCAMLR Convention in recent years Several contributions also draw on critical and regional perspectives to make sense of geopolitical pressures on Antarctic governance and how they might play out over the years and decades ahead Through its attention both to critical turning points in the history of the ATS and a broad range of conceptual approaches the book provides an authoritative assessment of the ATS's capacity to address emerging geopolitical stresses and provides strategies for future governance It is a timely resource for understanding the evolving dynamics in Antarctica and ensuring the region remains a zone of peace and scientific collaboration This book is a companion volume to McGee Edmiston and Haward 2022 *The Future of Antarctica Scenarios* from *Classical Geopolitics* in the Springer Polar Sciences Series Chapter 18 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com

The United States, the Soviet Union and the Geopolitical Implications of the Origins of the Cold War Nicolas Lewkowicz, 2018-10-30 The United States the Soviet Union and the Geopolitical Implications of the Origins of the Cold War 1945-1949 describes how the United States and the Soviet Union deployed their hard and soft power resources to create the basis for the institutionalization of the international order in the aftermath of World War Two The book argues that the origins of the Cold War should not be seen from the perspective of a magnified spectrum of conflict but should be regarded as a process by which the superpowers attempted to forge a normative framework capable of sustaining their geopolitical needs and interests in the post war scenario The United States the Soviet Union and the Geopolitical Implications of the Origins of the Cold War 1945-1949 examines how the use of ideology and the instrument of political intervention in the spheres of influence managed by the superpowers were conducive to the establishment of a stable international order It postulates that the element of conflict present in the early period of the Cold War served to demarcate the scope of manoeuvring available to each of the superpowers and studies the notion that the United States and the Soviet Union were primarily interested in establishing the conditions for the accomplishment of their vital geostrategic interests This required the implementation of social norms imposed in the respective spheres of influence a factor that provided certainty to the spectrum of interstate relations after the period of turmoil that culminated with the onset of World War Two

Routledge Handbook of Russian Foreign Policy Andrei Tsygankov, 2018-03-20 Providing a comprehensive overview of Russia's foreign policy directions this handbook brings together an international team of scholars to develop a complex treatment of Russia's foreign policy The chapters draw from numerous theoretical traditions by incorporating ideas of domestic institutions considerations of national

security and international recognition as sources of the nation's foreign policy. Covering critically important subjects such as Russia's military interventions in Ukraine and Syria, the handbook is divided into four key parts. Part I explores the social and material conditions in which Russia's foreign policy is formed and implemented. Part II investigates tools and actors that participate in policy making, including diplomacy, military, media, and others. Part III provides an overview of Russia's directions towards the United States, Europe, Asia, the Middle East, Eurasia, and the Arctic. Part IV addresses the issue of Russia's participation in global governance and multiple international organizations, as well as the Kremlin's efforts to build new organizations and formats that suit Russia's objectives. The Routledge Handbook of Russian Foreign Policy is an invaluable resource to students and scholars of Russian Politics and International Relations, as well as World Politics more generally.

The New Age of Naval Power in the Indo-Pacific Catherine L. Grant, Alessio Patalano, James A. Russell, 2023-07-05. A new framework contextualizes crucial international security issues at sea in the Indo-Pacific. Competition at sea is once again a central issue of international security. Nowhere is the urgency to address state-on-state competition at sea more strongly felt than in the Indo-Pacific region, where freedom of navigation is challenged by regional states' continuous investments in naval power and the renewed political will to use it to undermine its principles. The New Age of Naval Power in the Indo-Pacific provides an original framework in which five factors of influence explain how and why naval power matters in this pivotal part of the world. An international group of contributors make the case that these five factors draw upon a longstanding influence of naval power on regional dynamics and impact the extent to which different states in the region use naval power: the capacity to exert control over sea lanes, the capacity to deploy a nuclear deterrent at sea, the capacity to implement the law of the sea in an advantageous way, the ability to control marine resources, and the capacity for technological innovation. The New Age of Naval Power in the Indo-Pacific offers a fresh approach for academics and policy makers seeking to navigate the complexity of maritime security and regional affairs.

Cooperation and Conflict between Europe and Russia Magdalena Dembińska, Frederic Mérand, 2021-08-26. When thinking about relations between Europe and Russia, international relations scholars focus on why conflict has replaced cooperation. The geostrategic debate excludes the possible coexistence of cooperation and conflict. Tracking the evolution of conflict and cooperation patterns in three zones of contact: Estonia, Kaliningrad, and Moldova between 1991 and 2016, this edited volume argues that although the standard narrative remains compelling, local patterns of cooperation and conflict are partly autonomous from the geostrategic level. To account for the coexistence of cooperation and conflict, the first chapter elaborates a theoretical proposition distinguishing fluid, rigid, and disputed symbolic boundaries, which have different impacts on the ground. The subsequent chapters address distinct dimensions of Euro-Russian relations, paying attention to local reality in Estonia, Moldova, Ukraine, or Kaliningrad, different sectors from energy to people's movement, and across institutional contexts such as the EU and NATO. They confirm that the standard narrative holds in most cases but also that Euro-Russian relations vary in

crucial ways according to the interests and representations of actors immersed in specific geopolitical fields. Despite a deterioration of geostrategic relations between Europe and Russia since the end of the Soviet Union, *Cooperation and Conflict between Europe and Russia* explores the intriguing coexistence of conflict and cooperation at the local level and across sectors and institutions. The chapters in this book were originally published as a special issue of the journal *East European Politics*. **States and Societies in Motion** Boo Teik Khoo, Jafar Suryomenggolo, 2021. With contributions from leading scholars in their field, this collection of fourteen essays offers wide-ranging but incisive perspectives on East and Southeast Asian Studies. Apart from informing and enlightening the reader, the essays offer a tribute to Professor Takashi Shiraishi, the renowned Japanese scholar for his many contributions across continents and disciplines as well as his personal qualities as a long-time colleague, teacher, and friend. Now Professor Emeritus of the National Graduate Institute for Policy Studies (GRIPS) in Tokyo, Shiraishi sensei has had an outstanding career as a teacher, scholar, administrator, and policy advisor, his many roles including Director of the Southeast Asia Program at Cornell University and president both of GRIPS and the Institute of Developing Economies, Japan. Often with Japan at their nexus, the essays speak to three enduring themes in the research interests that spanned Shiraishi's half-century career: namely, political movements in Southeast Asia; national and regional politics in China and Japan; and the links between ideology, networks, and policies at critical junctures of state formation. An introduction by the editors reviews Shiraishi's contributions to many areas of scholarship; these are documented in the back matter in a bibliography of his publications and writings in English and Japanese. Among authors of the fourteen essays that follow are Patricio Abinales, Chris Baker, Caroline Hau, Peter Katzenstein, Pasuk Phongpaichit, and Thongchai Winichakul. In a concluding, lengthy interview, Shiraishi speaks for the first time in a frank, if light-hearted tone of his diverse experiences in academia as student, faculty, and administrator; his thoughts on area studies and their connections with official policy making; and his initiatives for building regional networks of research and intellectual exchange. A *Festschrift* in English, being a rarity for a Japanese scholar, this collection offers valuable, if indirect, insights into the links and influences that have animated a burgeoning community of international academic exchange and expert cooperation. This has been facilitated by Shiraishi's position, time, and again even if an accidental one, as he likes to say, as a transnational intersection point for colleagues, students, and friends in their many various research pursuits. A rich and rewarding collection.

On Geopolitics: Classical and Nuclear Ciro E. Zoppo, Charles Zorgbibe, 2012-12-06. At the outset of the 1980s, NATO decided to extend the scientific program of its Scientific Affairs Division to include the social sciences. Strategic and international studies were included within this domain with the express purpose of facilitating communication among experts and research centers in member countries as well as in the Organization itself on these important topics. This study is the result of the first Advanced Research Workshop on a subject of international relations. It focuses on the historical and theoretical aspects of geopolitics because they must necessarily precede studies of policy application. This was the intent of the organizers of the Workshop as

well as of the sponsoring institution The choice of the topic was ours Conclusions were drawn according to our own judgments being totally unfettered by any guidance from NATO officials Consequently the views and conclusions presented in this work do not represent any NATO policy other than the encouragement of research in political freedom by free scholars to strengthen freedom everywhere We speak for all participants in the Workshop when we voice our appreciation for the financial and organizational support extended us by the Scientific Affairs Division and the Information Directorate

Geopolitics. From a Classical to a Postmodern Approach Constantin Hlihor, 2014 *Introduction to Geopolitics* Colin Flint, 2016-10-06 This new updated edition of *Introduction to Geopolitics* presents the overarching themes of geopolitical structures and agents in an engaging and accessible manner which requires no previous knowledge of theory or current affairs Using new pertinent case studies and guided exercises the title explains the contemporary global power of the United States and the challenges it is facing the persistence of nationalist conflicts migration cyberwar terrorism and environmental geopolitics Case studies of the rise of the so called Islamic State the South China Sea disputes the Syrian civil war the Korean conflict and Israel Palestine emphasize the multi faceted nature of conflict The book raises questions by incorporating international and long term historical perspectives and introduces readers to different theoretical viewpoints including feminist contributions The new edition features expanded sections on network geopolitics and non state actors a new section on geopolitics of transnational business cyberwar an interpretation of ISIS within historical geopolitical trends as well as expanded discussion of the relevance of Boserup and neo Malthusians to environmental geopolitics *Introduction to Geopolitics* will provide its readers with a set of critical analytical tools for understanding the actions of states as well as non state actors acting in competition over resources and power Both students and general readers will find this book an essential stepping stone to a deeper and critical understanding of contemporary conflicts *The Return of Geopolitics in Europe?* Stefano Guzzini, 2012-10-25 The end of the Cold War demonstrated the historical possibility of peaceful change and seemingly showed the superiority of non realist approaches in International Relations Yet in the post Cold War period many European countries have experienced a resurgence of a distinctively realist tradition geopolitics Geopolitics is an approach which emphasizes the relationship between politics and power on the one hand and territory location and environment on the other This comparative study shows how the revival of geopolitics came not despite but because of the end of the Cold War Disoriented in their self understandings and conception of external roles by the events of 1989 many European foreign policy actors used the determinism of geopolitical thought to find their place in world politics quickly The book develops a constructivist methodology to study causal mechanisms and its comparative approach allows for a broad assessment of some of the fundamental dynamics of European security *Reader in Classical Geopolitics* Phil Kelly, 2014 **Geopolitics and International Relations**, 2021-12-13 Although we live in a globalised world territorially embedded factors are highly relevant in such domains as security economy energy environment politics diplomacy Today s analysts of world affairs are

often loosely referring to geopolitics but do not always clearly define it This book therefore offers a necessary framework an introduction into the main components of geopolitical analysis an overview of the main geopolitical schools of thought as well as reflections on how technology and geopolitics affect each other in economy energy and security In addition several empirical studies are showcased each developing innovative approaches Leading authors reflect upon containment analyse geopolitical myths research geoeconomic rivalries study mental maps analyse conflict through territorially embedded variables greed motivations and apply neo medievalism to study sub state diplomacy Contributors include David Criekemans Gyula Csurgai Luis da Vinha Manuel Duran Alexandre Lambert Antonios Nestoras and Steven Spittaels

Geopolitics. A historical review Jean Cédric Obame Emane, 2018-03-19 Essay from the year 2016 in the subject Politics Basics and General grade A Atlantic International University course Geopolitics language English abstract To begin with we would like to highlight that doing research on geopolitics has brought us to go deeper into a certain literature that enabled us to understand from the very beginning what geopolitics was meant for The literature we have used consists of two categories books relative to the latest changes on the discipline we mean geopolitics in the present The other literature is concerned with books of the 1990s with some authors like Tuathail Dalby and others books that give a historical perspective of geopolitics Furthermore we believe that for a discipline like geopolitics that we have never studied in our previous university studies we did not just need to make a good assignment and that is all but also to acquire tools that might help us to be knowledgeable in that coursework For this reason we needed to read books that analyze and explain what the essence of geopolitics is Our basic thesis statement is that the geographical conditions of a country this is to say that its endowment in natural resources can have an impact on its geopolitical orientation which is its foreign policy In other words geographical conditions influence a country s foreign policy or attitude in international affairs This we will provide an example with Gabon our home country

The Routledge Research Companion to Critical Geopolitics Assoc Prof Merje Kuus, Professor Joanne Sharp, Professor Klaus Dodds, 2013-02-28 Bringing together leading researchers associated with the different forms of critical geopolitics this volume produces an overview of its achievements limitations and areas of new and potential future development The Companion is designed to serve as a key resource for an interdisciplinary group of scholars and practitioners interested in the spatiality of politics

Geopolitics, Geography and Strategic History Geoffrey Sloan, 2017-02-17 This work explains the course of international politics from the rebirth of the German Empire to the rise of China with particular though not exclusive reference to spatial relationships

Geopolitics Francis P. Sempa, 2002 Writers observers and practitioners of international politics frequently invoke the term geopolitics to describe explain or analyze specific foreign policy issues and problems Such generalized usage ignores the fact that geopolitics as a method of understanding international relations has a history that includes a common vocabulary well established if sometimes conflicting concepts an extensive body of thought and a recognized group of theorists and scholars In *Geopolitics* Francis P

Sempa presents a history of geopolitical thought and applies its classical analyses to Cold War and post Cold War international relations While mindful of the impact of such concepts as globalization and the information revolution on our understanding of contemporary events Sempa emphasizes traditional geopolitical theories in explaining the outcome of the Cold War Using the work of Halford Mackinder James Burnham Nicholas Spykman Alfred Thayer Mahan and others he shows that even though the struggle between the Western allies and the Soviet empire was unique in its ideological component and nuclear standoff the Cold War fits into a recurring geopolitical pattern It can be seen as a consequence of competition between land powers and sea powers and between a potential Eurasian hegemonic power and a coalition of states opposed to that would be hegemony The collapse of the Soviet empire ended the most recent threat to global stability At the dawn of the twenty first century no power or alliance of powers poses an immediate threat to the global balance of power Indeed the end of the Cold War generated hopes for a new world order and predictions that economics would replace geopolitics as the driving force in international politics However as Sempa points out Russian instability the nuclear dimension of the India Pakistan conflict and Chinese bids for dominance have turned the Asia Pacific region into what Mahan called debatable and debated ground Russia Turkey Iran India Pakistan China Japan the Koreas and the United States all have interests that collide in one or more of the areas of this region The timeliness and deep historical perspective of Sempa s analysis will remind statesmen strategists and interested citizens that the current world situation will not last forever The defeat of one would be hegemonic power is likely to be followed by a new challenger or challengers to current stability in the international system

Astropolitik Everett Dolman, 2011-10-03 This volume identifies and evaluates the relationship between outer space geography and geographic position astrogeography and the evolution of current and future military space strategy In doing so it explores five primary propositions
