**Climate Change Law and Policy** Cinnamon Piñon Carlarne, 2010 This text provides a comparative socio legal analysis of global climate change laws and policies in the European Union and the United States shedding light on the disparate legal and political strategies being used to address climate change in these two regions and the likely successes and failures of current policy strategies

**Anglo-American Relations** Alan Dobson, Steve Marsh, 2013-01-17 This book provides an examination of contemporary Anglo American relations Sometimes controversially referred to as the Special Relationship Anglo American relations constitute arguably the most important bilateral relationship of modern times However in recent years there have been frequent pronouncements that this relationship has lost its specialness This volume brings together experts from Britain Europe and North America in a long overdue examination of contemporary Anglo American relations that paints a somewhat different picture The discussion ranges widely from an analysis of the special relationship of culture and friendship to an examination of both traditional e g nuclear relations and more recent e g environment policies

Contemporary developments are discussed in the context of longer term trends and contributing authors draw upon a range of different disciplines including political science diplomacy studies business studies and economics Coupled with a substantive introduction and conclusion the result is an insightful and engaging portrayal of the complex Anglo American relationship The book will be of great interest to students of US and UK foreign policy diplomacy and international relations in general

*The EU's Role in Global Governance* Bart Van Vooren, Steven Blockmans, Jan Wouters, 2013-01-17 The rise to power of such countries as China and Brazil as well as the EU sovereign debt crisis have deeply affected the capacity of the EU to influence global realities This book brings together prominent legal scholars and practitioners to investigate the extent to which the EU can shape this on going re orientation of the international scene

*International Law* Jan Wouters, Cedric Ryngaert, Tom Ruys, Geert De Baere, 2018-12-13 This textbook offers for the first time a comprehensive analysis of the classic doctrines and main areas of international law from a European perspective meeting the needs of the many European law schools teaching public international law in English Special attention is devoted to the practice of the European Union the Council of Europe and European States both civil law and common law countries with regard to international law In particular the book analyses the interplay between international law EU law and national law in the case law of the Court of Justice of the EU the European Court of Human Rights and national jurisdictions in Europe It provides the reader with insights into how the international legal practice of the EU and its Member States impacts the development of international law both in terms of doctrines such as treaty making and customary law the exercise of extraterritorial jurisdiction state responsibility and the settlement of disputes as well as particular sub fields of international law such as human rights law and international economic law In addition the book covers other important areas such as the use of force and collective security the law of armed conflict and global and regional international organisations It provides European perspectives on

all these issues and will be of great value to students scholars and practitioners

**Environmental justice in Africa: Cultural and economic impacts on the legal systems** Dennis Oghenerobor Agelebe, 2025-05-26 This book's overarching theme is to discern the role of law in shaping environmental justice in Africa. Simultaneously it delves into the intricate interplay of economic and cultural factors that can either facilitate or impede the pursuit of justice. Acknowledging that environmental justice transcends legal frameworks alone, the book emphasises its recognition as a social pillar integral to sustainable development. In this holistic perspective, environmental justice is positioned on equal footing with environmental protection and economic sustainability, highlighting its multifaceted nature in Africa.

Distributional Choices in EU Climate Change Law and Policy Javier De Cendra de Larragán, 2011-01-01

Climate change policy inevitably has two core components: the goals and the means chosen to pursue those goals. Decisions on goals and means necessarily have distributional consequences. Any policy choice generates winners and losers. While this outcome cannot be avoided even doing nothing leads to distributional consequences, policymakers can through the choice design and implementation of policies shape to some extent the distribution of the burdens of mitigation and adaptation to climate change. In greater depth than any previous legal study in the field, this book deals with the way in which the European Union (EU) has dealt with climate change and with the distribution of the benefits and costs of climate change mitigation policies among affected parties. With extraordinary thoroughness, the author assesses the legality of choices made particularly concerning mitigation targets and timelines and examines the role that legal principles can play in the adoption, interpretation and judicial testing of distributional choices. His analysis of the tension between such choices and EU law is bolstered by an exploration of emerging legal principles which could provide additional guidance in this challenging and controversial area. Among the core issues dealt with are the following: relationship among mitigation, adaptation and sustainable development regulations as means to make distributional choices; distributional choices between generations and the principle of intergenerational justice; distributional choices concerning firms and individuals; the participation of affected parties in distributional choices; access to justice in EU courts to challenge violations of procedural environmental rights; the role of legal principles in making evaluating and testing distributional choices; the principle of proportionality with its tests of appropriateness and necessity; the principle of equality; the precautionary principle; the principle of prevention; the polluter pays principle. A concluding chapter offers deeply informed recommendations regarding the design of EU climate change law, including a preliminary assessment of EU-wide personal carbon trading. In its insightful illumination of how the inevitable trade-offs, weaknesses, inconsistencies and ambiguities in the way law deals with distributional choices renders them vulnerable to external pressures, this book will be of enormous value to regulators and policymakers concerned with effective, efficient and fair climate change measures. As a critical assessment of existing EU climate change laws and policies and as a systematic

analysis of the problem of burden sharing this book will also prove highly valuable to academics in environmental fields of study    Symposium ,2008    **Index to Legal Periodicals & Books** ,2006    **Policy Positions and Final Report** National Legislative Conference.
