Climate Change Law Mitigation And Adaptation American Casebook Series:

Climate Change Law Richard G. Hildreth,2009 This casebook examines climate change law using primary source materials commentary and problem exercises Climate science and policy are integrated into each section of the book Reducing global and U S greenhouse gas emissions and adapting to the impacts of climate change receive approximately equal treatment Mitigation is covered in chapters on the probable post Kyoto regime energy law and policy national and state law theory and practice of economic instruments such as cap and trade and carbon taxes and carbon sequestration Adaptation is addressed in ecosystem sectoral regional and human settlement chapters [Current Publications in Legal and Related Fields](#) ,2009

Climate Change Finance and International Law Alexander Zahar,2016-12-01 Since 2010 a significant quantity of international climate change finance has begun to reach developing countries However the transfer of finance under the international climate change regime the legal and ethical obligations that underpin it the constraints on its use its intended outcomes and its successes failures and future potential constitutes a poorly understood topic Climate Change Finance and International Law fills this gap in the legal scholarship The book analyses the legal obligations of developed countries to financially support qualifying developing countries to pursue globally significant mitigation and adaptation outcomes as well as the obligations of the latter under the international regime of financial support Through case studies of climate finance mechanisms and a multitude of other sources this book delivers a rich legal and empirical understanding of the implementation of states climate finance obligations to date The book will be of interest to scholars and students of international law and policy international relations and the maturing field of climate change law **Trade and Climate Change**

Ludivine Tamiotti,United Nations Environment Programme,2009 This report aims to improve understanding about the linkages between trade and climate change It shows that trade intersects with climate change in a multitude of ways For example governments may introduce a variety of policies such as regulatory measures and economic incentives to address climate change This complex web of measures may have an impact on international trade and the multilateral trading system

Climate Change Law Coplan, Karl S.,Green, Shelby D.,Fischer Kuh, Katrina,Narula, Smita,Rábago, Karl R.,Valova, Radina,2021-12-10 This timely and incisive book combines an introduction to the core legal and policy issues presented by climate change with a deeper analysis of decisions that will define the path forward Offering a guide to key terms concepts and legal principles in the field this book will help readers develop a sophisticated perspective on issues central to climate change law and policy

Climate Change and the Law Chris Wold,David Hunter,Melissa Powers,2009 **Climate Change Litigation** Jacqueline Peel,Hari M. Osofsky,2015-04-09 This examination of the role of litigation in addressing the problem of climate change focuses not only on how the massive and growing number of lawsuits influences regulation directly but also on how the lawsuits shape corporate behaviour and public opinion It provides readers with an understanding of how these lawsuits have shaped approaches to mitigation and adaptation and have been used to try

to force and to block regulation There is a particular emphasis on lawsuits in the United States and Australia the two jurisdictions which have had the most climate change litigation in the world and the lessons provide broader insights into the role of courts in addressing climate change *International Climate Change Law and Policy* Thoko Kaime,2014-03-26

Climate change poses fundamental and varied challenges to all communities across the globe The adaptation and mitigation strategies proposed by governments and non governmental organisations are likely to require radical and fundamental shifts in socio political structures technological and economic systems organisational forms and modes of regulation The sheer volume of law and policy emanating from the international level makes it uncertain which type of regulatory or policy framework is likely to have a positive impact The success or failure of proposed measures will depend on their acceptability within the local constituencies within which they are sought to be applied Therefore there is an urgent need to better comprehend and theorise the role of cultural legitimacy in the choice and effectiveness of international legal and policy interventions aimed at tackling the impact of climate change The book brings together experts to present perspectives from different disciplines on the issue of international climate change law and policy Beginning from the premise that legitimacy critiques of international climate change regulation have the capacity to positively influence policy trends and legal choices the book showcases innovative ideas from across the disciplines and investigate the link between the efficacy of international legal and policy mechanisms on climate change and cultural legitimacy The book includes chapters on with a theoretical basis as well as specific case studies from around the globe The topics covered include land use planning as a tool of enhancing cultural legitimacy indigenous peoples in international environmental negotiations transnational advocacy networks community based forestry management and culture and voluntary social movements *Climate Change Law* Karl

S Coplan,Shelby D Green,Katrina Fischer Kuh,Smita Narula,Karl R Rábago,Radina Valova,2023-04-28 This timely and incisive book combines an introduction to the core legal and policy issues presented by climate change with a deeper analysis of decisions that will define the path forward Offering a guide to key terms concepts and legal principles in the field this book will help readers develop a sophisticated perspective on issues central to climate change law and policy Building a pathway to literacy in climate change policy chapters provide an accessible overview of key energy regulations and laws governing energy projects legal mechanisms to regulate GHG emissions and the role of state and local governments in developing mitigation and adaptation policy particularly in the building and transportation sectors The authors highlight the relationship between human rights and climate change using the framework of human rights law analyze the use of litigation to compel climate change mitigation and adaptation and suggest ways to achieve international cooperation Providing a deep understanding of ongoing debates about the design and implementation of climate change law and policy this book will be an essential resource for students and researchers of environmental and climate change law governance and regulation It will also be useful for policymakers and practitioners in the field for its practical insights into future developments and solutions

Environmental Law in Context Robin Kundis Craig, 2008 Relying on graphics flow charts cases and administrative materials it provides a step by step introduction to six of the most important federal environmental statutes The Second Edition will use new cases to allow professors to discuss how global climate change is affecting environmental and natural resource regulation in a variety of contexts Specifically climate change will be the centerpiece of new cases involving NEPA the ESA the Clean Air Act Massachusetts v EPA and citizen suit standing

Cases and Materials on Environmental Law

Daniel A. Farber, Jody Freeman, Ann E. Carlson, 2010 The Eighth Edition provides up to date treatment of climate change issues This classic casebook provides students with a thorough understanding of all major federal environmental regulatory schemes as well as insight into current policy controversies Particular attention is given to the proper role of cost benefit analysis the appropriate judicial role in reviewing agency decisions and the impact of constitutional decisions relating to federalism standing and takings It also covers the latest Supreme Court cases on subjects from Superfund to water pollution as well as the major regulatory changes in the first year of the Obama Administration

arises out of disputes over natural resources Creating context through a place based approach the authors illuminate policy and breathe life into statutory interpretation Students from every part of the country will find something to relate to their own experience in the panoply of issues located in this casebook Natural Resources Law A Place Based Book of Problems and Cases Second Edition features broad national coverage that extends beyond traditional public lands topics illustrative examples that involve specific locations often including a photo or map to create context interesting problems in each chapter with rich fact patterns that raise contemporary policy issues discriminating case selection that includes a mix of landmark and recent decisions relevant statutory and regulatory excerpts begin every chapter eliminating the need for a statutory supplement consistent emphasis on primary sources throughout the text adaptable and teachable organization readings are grouped into assignment sized segments Updated throughout and with expanded geographic coverage the Second Edition includes extensive coverage of climate change including Massachusetts v EPA and discussion of adaptation mitigation policy options new material on national energy policy including its relationship to climate change and national security a new chapter on marine resources excerpts of recent case decisions NAHB v Defenders of Wildlife ESA and CWA delegation Sierra Forest Legacy v Rey NEPA and logging challenge Citizens for Better Forestry v U S Department of Agriculture California ex rel Bill Lockyer v United States Department of Agriculture Roadless Rule Challenge Hicks v Dowd termination of conservation easements Hage v United States regulatory taking of water rights Rapanos v United States wetlands jurisdiction ESA polar bear listing new Forest Service planning regulations wetland mitigation rule and final CWA water transfer rule Now with a wider geographic scope in the Second Edition to include more of the eastern states few casebooks in any subject offer more teaching support than Natural Resources Law A Place Based Book of Problems and Cases

Comparative Climate Change Litigation: Beyond the Usual Suspects Francesco Sindico, Makane Moïse

Mbengue, 2021-01-21 This book is based on the acknowledgment that climate change is a multifaceted challenge that requires action on the part of all stakeholders including civil society and the notion that climate change is at a tipping point with urgent measures needed in the next decade Against this background civil society is turning its attention to the courts as a means to directly influence climate action partly because of the global scepticism towards the progress of global climate action despite the ongoing implementation of the Paris Agreement Focusing on the individual broadly representing civil society the book offers fresh perspectives on climate change litigation While most of the literature on climate change litigation examines the same specific jurisdictions mostly common law countries US and Australia in particular this book also considers specific countries in Asia Africa and Latin America with little or no climate change litigation It explores the reasons for the lack of litigation and discusses what measures should or could be taken to change this situation and push forward climate action Unlike other literature on the subject this book analyses climate change litigation using a scenario based methodology Combining rigorous academic analysis with a practical policy oriented focus the book provides valuable insights

for a wide range of stakeholders interested in climate change litigation It appeals to civil society organisations around the world international organisations and law firms interested in climate change litigation **The Law of Adaptation to Climate Change** Katrina Fischer Kuh,2012 The laws that try to reduce climate change are well known But what about the climate change that is occurring regardless of these efforts The Law of Adaptation to Climate Change takes a sweeping look at the current and proposed legal aspects of coping with climate change from drought extreme precipitation heat waves and wild fires to global shifts in temperature sea level water and food supply coastal conditions infrastructure ecosystems and human health and economies Applicable laws exist at all levels but are uncoordinated and embody numerous contradictions and inevitable gaps **Climate Change Remedies** Jaap Spier,Ulrich Magnus,2014-07-01 Climate change poses very serious risks to mankind Adaptation and damages are emphasised more and more Although adaptation is important priority should be given to prevention mitigation The contributions in this volume emanate from an international research project that deals with a legal kaleidoscope of legal issues and focuses primarily on preventive remedies The contributions of Spier and Magnus tackle injunctive relief and discuss the myriad of legal questions courts have to answer if they are willing to grant injunctive relief This part of the book addresses procedural private international and substantive law Kemp's contribution discusses the role criminal law could play to come to grips with the threats of climate change So far the greater part of the debate is about the United States Europe and increasingly Asia Ruppel fills this gap by painting an African perspective **Cases and Materials on Environmental Law** Daniel A. Farber,Jody Freeman,2008-08-21 The supplement contains all of the relevant up to the minute materials on climate change The new materials can be integrated into the casebook or taught as a separate module and they are compatible with multiple teaching strategies *Climate Change and the Law* Erkki J. Hollo,Kati Kulovesi,Michael Mehling,2012-12-04 Climate Change and the Law is the first scholarly effort to systematically address doctrinal issues related to climate law as an emergent legal discipline It assembles some of the most recognized experts in the field to identify relevant trends and common themes from a variety of geographic and professional perspectives In a remarkably short time span climate change has become deeply embedded in important areas of the law As a global challenge calling for collective action climate change has elicited substantial rulemaking at the international plane percolating through the broader legal system to the regional national and local levels More than other areas of law the normative and practical framework dedicated to climate change has embraced new instruments and softened traditional boundaries between formal and informal public and private substantive and procedural so ubiquitous is the reach of relevant rules nowadays that scholars routinely devote attention to the intersection of climate change and more established fields of legal study such as international trade law Climate Change and the Law explores the rich diversity of international regional national sub national and transnational legal responses to climate change Is climate law emerging as a new legal discipline If so what shared objectives and concepts define it How does climate law relate to other areas of law Such questions lie at the

heart of this new book whose thirty chapters cover doctrinal questions as well as a range of thematic and regional case studies. As Christiana Figueres Executive Secretary of the United Nations Framework Convention on Climate Change (UNFCCC) states in her preface these chapters collectively provide a review of the emergence of a new discipline, its core principles and legal techniques and its relationship and potential interaction with other disciplines.
