Food Security and Risk Reduction in Bangladesh Umma Habiba,Md.

Anwarul Abedin,Abu Wali Raghieb Hassan,Rajib Shaw,2015-03-18 This book draws examples from food security issues in Bangladesh The book is structured around those issues and underlying causes of food security the implications from different sectors policy analysis and the role and actions of various stakeholders from different sectors to ensure food security Bangladesh is situated in a climatically vulnerable position and is impacted frequently by such climatic hazards as floods cyclones droughts and salinity intrusion Due to global atmospheric changes abrupt shifts in climatic conditions severely affect Bangladesh s agriculture Although Bangladesh has made significant progress in increasing domestic production of food grain if the production of major cereals is hampered due to climate change food security will be in jeopardy Most estimates show that a huge amount of additional food grain will be required to feed the growing population of the country Ensuring food security for all is the overarching goal of Bangladesh s national food policy Therefore ensuring food security in the future requires a great deal of additional effort in yield improvement with limited scope for expanding the area under cultivation The primary target readers for this book are students and researchers in the fields of environment disaster risk reduction and climate change studies The book will provide them with a good idea of the current trend of research in the field and will furnish basic knowledge on this important topic Another target group comprises practitioners and policy makers who will be able to apply collective knowledge to policy and decision making

Science and Technology in Disaster Risk Reduction in Asia Rajib

Shaw,Koichi Shiwaku,Takako Izumi,2017-10-13 Science and Technology in Disaster Risk Reduction in Asia Potentials and Challenges provides both a local and global perspective on how to implement the Sendai Framework for Disaster Risk Reduction Topics demonstrate the advancement of scientific research as it applies to early warning systems including identifying risk and the strengthening of infrastructure for different types of hazards Through different major disasters it has

become evident that there must be a balance between hard and soft technology and physical process and social solutions This book demonstrates how this has been successfully implemented in Asia and how these applications can apply on a global basis Covers new research on the role of science in Disaster Risk Reduction and lessons learned when research has been applied Utilizes case studies to outline the broader lessons learned Focuses on the Sendai Framework which was adopted in the Third UN World Conference in 2015 *Transforming Coastal Zone for Sustainable Food and Income Security* T.D. Lama,Dhiman Burman,Uttam Kumar Mandal,Sukanta Kumar Sarangi,H.S. Sen,2022-08-09 Coastal areas are commonly defined as the interface or transition areas between land and sea including large inland lakes Overall about 50 70 % of the global population live within 100 km of the coastline covering only about 4 % of earth s land thereby drawing heavily on coastal and marine habitats for food building sites transportation recreational areas and waste disposal The people of these zones depend mainly on low productive agriculture due to several constraints such as prolonged water logging and drainage congestion in predominantly low lying areas with heavy soils during the wet season preponderance of saline and acid sulphate soils scarcity of good quality irrigation water particularly in the dry season seawater intrusion into adjoining lands and water pollution due to eutrophication and others affecting the aquatic habitats etc Carbon sequestration in coastal areas such as marshes lagoons etc has significant influence on soil quality and the carbon pool in soils as well as their impacts on the environment Over and above these the coastal areas are prone to disasters due to climate change leading to colossal loss of lives and properties in many areas Forestry and mangrove dynamics in particular because of their continuing diminishing nature are also subjects of interest affecting the ecology of coastal zones requiring appropriate attention The international symposium held in this context on Transforming Coastal Zones for Sustainable Food and Income Security in virtual mode in March 2021 offered scope to present and discuss various thematic areas by eminent scientists from all over the world The proceedings of selected papers presented reflect cross sectoral views of the areas highlighting wherever necessary a fusion of technologies with the ultimate target to suggest livelihood security and sustainable development for the sensitive coastal zones The book intends to share the knowledge with researchers academicians and various other stakeholders to address the complex problems of coastal regions production constraints social economic technical and environmental issues to draw out strategies for resilient agricultural technologies and improving livelihood security in coastal agro ecosystems

Environmental Uncertainty and Local Knowledge Anna-Katharina Hornidge,Christoph Antweiler,2014-03-15

Southeast Asia is a laboratory showing current worldwide ecological issues Environmental change natural resource exploitation as well as global climate change increasingly threaten people s livelihoods Environmentally based uncertainties foster a high level of knowledge uncertainty This poses a constantly growing threat to agricultural production Vulnerable communities with a low degree of resilience are most severely affected But local communities have abilities to innovate and develop locally embedded coping strategies The contributors of this volume are most interested in environmental change that

fosters knowledge uncertainties Regions discussed include the Mekong Delta in Vietnam Moluccas Central Kalimantan West Sumatra and South Sulawesi in Indonesia and Tangail Region in Bangladesh *Advancement of GI-Science and Sustainable Agriculture* Jayanta Das,Somenath Halder,2023-09-27 This book describes the contributing aspects of contemporary developments related to sustainable agricultural resources and assessment of sustainable agriculture in developing nations The issues like food crisis and declining agro productivity post pandemic food security zonation and mapping technique viewing food crisis biotechnology and sustainable agricultural scaling hunger indices health hazard and food crisis changing climate and food availability consumer load and fertilizer usage growing demand and increasing usage of harmful chemical in agro fields are regarded as serious concerns Thereafter the scope of sustainable agricultural potentiality SAP modeling amidst the arena of deforestation and encroachment of new cultivable land impact of pandemic on sustainable agriculture using wastewater as non sustainable agricultural practice applying geospatial techniques on extreme weather susceptibility and agro production soil erosion and poor agricultural production questioning shifting cultivation on the issue of sustainability meteorological drought and irrigational gaps occupational mobility and loss of agricultural heritage farm excreta burning and air quality index AQI GI Science and sustainable agro management community preparedness in food crisis management multi criteria hunger index MCHI climate change declining sustainable agro production are worth some Almost the entire world has recently suffered from several natural and human induced problems among which food crisis and unsustainable agriculture throw significant challenges to human society Contrastingly if modern technology and means with advanced monitoring and calibration methodology and policy guidance can help it will undoubtedly reduce half of the world s problems and ensure the future survival of human society In addition this approach also can minimize the other partially linked problems like climate change and food shortage livelihood crisis environmental refugees international trade balance global food supply chain interruption the ever expanding gap between rich and poor and so on Therefore properly nurturing the knowledge on the application of GI Science for an agriculturally sustainable society and their monitoring and management can curtail the gap between science policy and the ground level scenario concerned **Third National**

Communication of Bangladesh to the United Nations Framework Convention on Climate Change Qazi

Kholiquzzaman Ahmad,2018 **Bangladesh: Main report** ,2012 Ecology, Politics and Violent Conflict Mohamed Suliman,1999 Violent internal conflicts in more and more countries are ruining the lives of millions of people and undermining the ability of their governments to provide security and a tolerable economic existence The contributors to this book take a new view of the reasons for this grave development in Africa the Balkans Central Asia and elsewhere They question traditional analyses of conflict which rely primarily on ethnic religious and cultural explanations since these do not take account of the increasingly obvious link between the growing scarcity of renewable resources and violent conflict in developing countries Shortages of cropland fresh water woodfuel pasture and marine resources cannot be ignored At the

same time this book argues that one cannot understand domestic conflicts simply in environmental terms For environmental scarcity functions in a society within a complex matrix of historically derived economic and political situations In particular an unequal social distribution of resources exacerbates scarcity and fuels popular conflict

Climate Change and Children, 2008 The study reviews the implications of climate change for children and future generations drawing on relevant experiences in different sectors and countries of promoting child rights and well being It traces in considerable detail the pathways through which shifts in temperature and precipitation patterns create serious additional barriers to the achievement of the child survival development and protection goals embraced by the international community The role of children as vital participants and agents of change emerges as a key theme Preface

Human Development Report 2007/2008 United Nations Development Programme, 2007-11-15 Human development is about putting people at the center of development It is about people realizing their potential increasing choice and enjoying the freedom to lead the lives they value Created in 1990 the Human Development Report has explored themes including gender equity democracy human rights globalization cultural liberty and water scarcity The past years have witnessed the emergence of a growing consensus on climate change Governments across the world have seen the warning signs The science linking global warming to human activity is unequivocal The economic case for action is compelling the costs of inaction will heavily outweigh the costs of action Yet the politics lags behind the science and the economics Collectively the world's governments are failing to act with the urgency demanded by the scale of the threat The window of opportunity for avoiding dangerous climate change is closing fast This year's Human Development Report explains why we have less than a decade to change course and start living within our global carbon budget It explains how climate change will create long run low human development traps pushing vulnerable people into a downward spiral of deprivation Because climate change is a global problem with global causes and effects it demands a global response with countries acting on the basis of their historic responsibility and capabilities
