[The Fashion Industry and Its Use of Public Relations Tools](#) ,2020-08-17 Seminar paper from the year 2014 in the subject Communications Public Relations Advertising Marketing Social Media grade 1 7 University of Siegen language English

abstract The main focus of this paper is the fashion industry and its use of public relations tools such as fashion blogs and applications like Instagram. Fashion blogs are frequently linked to Instagram pages to reach and attract more customers as well as increase customers satisfaction. The modern business world in the 21st century could not be as prevailing and profound as it is without the use of new technologies. It is a major advantage for every business including the Fashion market. Information technologies enable business owners and their employees to stay in touch with customers, business partners and intermediaries bearing while out of the office. Cell phones allow individuals easy access to e-mails, open software applications, apps and social network platforms. Companies are able to save costs when it comes to promotion, improve services and attract new customers easily. By analyzing the needs of customers, understanding shortfalls in business which need to be corrected and by listening to millions of bloggers worldwide, it becomes easier to create exactly what customer XY wants today. More than 100 million bloggers are communicating, sharing their experiences of products, services and other topics. These bloggers have the power to influence ordinary people's decisions. The use of blogs creates a new branch of public relations, a new strategy to attract customers and to influence buying decisions. This feedback from bloggers worldwide is the best honest, fastest and easiest public relation tool an industry may get.

Exploring the impact of social media on individuals' self-esteem and body image Hanna Belhorodska, 2023-08-30. Essay from the year 2023 in the subject Communications Public Relations Advertising Marketing Social Media grade C Paedagogic Institute for Psychoanalysis and Psychotherapy Hannover language English abstract Social media offers a plethora of opportunities for individuals to share their thoughts, experiences and interests with a global audience, blurring the lines between personal and public spheres. Users can post photos, videos, status updates and engage in real time conversations, facilitating instant communication and fostering virtual communities. Beyond personal interactions, social media has also emerged as a powerful platform for businesses, influencers and organizations to reach their target audiences, influencing consumer behaviors and shaping societal trends. The allure of social media lies in its promise of connectivity and belongingness, allowing users to form and maintain social relationships regardless of physical proximity. However, the pervasive nature of these platforms and the constant exposure to a stream of curated content have raised concerns about their potential impact on individuals' psychological well-being. In light of these concerns, researchers and mental health professionals have sought to understand the intricate relationship between social media usage and individuals' psychological well-being, particularly concerning self-esteem and body image. By investigating the potential effects of social media on these aspects, researchers aim to unveil the complexities of virtual interactions and their implications for mental health. This research paper aims to explore the impact of social media on individuals' self-esteem and body image, with a focus on understanding how these platforms influence self-perception, body satisfaction and overall psychological well-being. By shedding light on this critical area of study, this research intends to provide valuable insights for individuals, parents, educators, mental health practitioners, social media platforms and policymakers, guiding the development
