Master Techniques in Orthopaedic Surgery: Orthopaedic Oncology and Complex Reconstruction Franklin H. Sim, Peter F.M. Choong, Kristy L. Weber, 2011-12-07 Master Techniques in Orthopaedic Surgery: Orthopaedic Oncology and Complex Reconstruction focuses on bone and soft tissue tumors, which are among the most challenging problems for orthopaedic surgeons to manage. The book is broad in scope and includes coverage of massive reconstruction following trauma. The international authorship includes outstanding surgeons from Germany, Austria, Italy, Australia, and Great Britain, in addition to the United States. The contributors describe their preferred techniques in step-by-step detail, point out pertinent anatomy, and offer pearls and tips for improving results. The book is thoroughly illustrated with full-color sequential surgeon's eye-view intraoperative photographs as well as drawings by noted medical illustrators.

Musculoskeletal Imaging Felix Chew, Hyojeong Mulcahy, Alice S. Ha, 2012 Musculoskeletal Imaging Third Edition features almost 400 cases drawn from the teaching files of leading medical centers. These practical cases encompass all imaging modalities including radiography, CT, MR, nuclear medicine, and sonography, as well as all categories of musculoskeletal disease including trauma, tumors, joint disease, endocrine, metabolic, bone disease, and more. Organized by anatomic region, each case follows a consistent format and is presented as an unknown diagnosis with brief clinical history, images, description of findings, differentials, diagnosis, and discussion of care. This format simulates the experience of working through a case with an expert consultant, making Musculoskeletal Imaging an ideal resource for sharpening diagnostic skills for those preparing for board examinations or for reinforcing practical knowledge.
