 World War II the amount of information generated in the science of Gemology has increased tremendously Therefore this
 book Dictionary of Gems and Gemology was written with the aim of providing a relatively complete dictionary to assist all
 students hobbyists scientists and interested parties in the fields of Gems and Gemology The forerunner to this book was
 called Dictionary of Gems and Gemology English Persian Persian English published in Tehran Iran in 1997 It was written
 with the aid of more than thirty reference books relating to gemology In response to the effort required to clarify the terms
 within I decided to compile a book that brings all the relevant terms into one book This new book eliminates the use of
 different reference books and compiles nearly all the relevant terms into a one stop useful text It took twenty five years to
 collect the terms and the information so as to present a complete and functional lexicon The text is supported by nearly 170
 illustrations and 21 tables to provide detailed and succinct information I hope and trust that this book will reach the high
 standard of other gemological dictionaries If you have criticisms or suggestions please feel free to contact me Professor Dr
