

# Diapering Procedure

## Important Steps to Remember!

1 Assemble all supplies before getting started. Perform hand hygiene. Gloves may be used but they are not a substitute for handwashing. Gloves should be worn when a child has diarrhea.

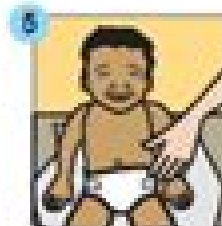

2 Place child on diapering table/surface. Remove soiled diaper and fold it inwards. Do not leave child unsupervised on diaper table at any time.

3 Clean child's bottom from front to back with moist towelettes.

4 Discard diaper, towelettes and gloves in garbage. If the application of cream ointment is required, use a clean, disposable applicator to obtain ointment from its container. Discard applicator in garbage.

5 Wipe your hands (if visibly soiled) with a clean, moist towelette and discard in garbage. Diaper and dress the child.

6 Wash child's and your hands.

7 Return child to supervised area.

8 Double-bag soiled clothing for parents. Do not reuse soiled clothing or cloth diapers.

\*Consult your Public Health Inspector for cloth diapering procedures.

9 Clean and disinfect the diaper change surfaces between each child as follows:

Clean the diaper change surface using a single-use towel and a detergent solution.  
Rinse the diaper change surface using clean water and a clean, single-use towel to remove soil and/or detergent residue.  
Disinfect the diaper change surface, making sure that the entire surface remains wet for the required contact time (e.g. 1 minute for a 200ppm bleach solution). Follow manufacturer's instruction for all other solutions.  
3 Air dry the diaper change surface or wipe it dry using a clean, single-use towel.

10 Wash your hands again.

All done!
