

# Dichotomous Key Practice: A Key to Insects

Name: \_\_\_\_\_ Date: \_\_\_\_\_ Class Hour: \_\_\_\_\_

**Introduction:** A dichotomous key is used to help identify unknown living things. A dichotomous key is created after the living things have been identified, classified and named. It is a tool for everyone to use to observe structural characteristics of an organism to discover its name. The keys usually ask YES or NO questions about important characteristics of the organism you are trying to identify. If you answer each question correctly and follow the directions given on the key, the key will lead you to the name of the living thing. You always start at step 1 of the key. If you answer questions incorrectly, and are led to the wrong name, you will need to start over at step 1 and try again.

**Part 1 Directions:** Use the dichotomous key below to identify the insect in each picture. Write the name of each bird above each insect's picture in the space provided.
