Dialectological And Folk Dialectological Concepts Of Space Linguae Litterae:

Dialectological and Folk Dialectological Concepts of Space Sandra Hansen, Christian Schwarz, Philipp Stoeckle, Tobias Streck, 2012-10-30 In variational linguistics the concept of space has always been a central issue. However, different research traditions considering space coexisted for a long time separately. Traditional dialectology focused primarily on the diatopic dimension of linguistic variation, whereas in sociolinguistic studies diastatic and diaphasic dimensions were considered. For a long time, only very few linguistic investigations tried to combine both research traditions in a two-dimensional design, a desideratum which is meant to be compensated by the contributions of this volume. The articles present findings from empirical studies which take on these different concepts and examine how they relate to one another. Besides dialectological and sociolinguistic concepts, also a lay perspective of linguistic space is considered, a paradigm that is often referred to as folk dialectology. Many of the studies in this volume make use of new computational possibilities of processing and cartographically representing large corpora of linguistic data. The empirical studies incorporate findings from different linguistic communities in Europe and pursue the objective to shed light on the interrelationship between the different concepts of space and their relevance to variational linguistics.

Cityscapes and Perceptual Dialectology

Jennifer Cramer, Chris Montgomery, 2016-02-22 This edited collection presents papers relating to the state of the art in Perceptual Dialectology research. The authors take an international view of the field of Perceptual Dialectology, broadly defined to assess the similarities and contrasts in non-linguists' perceptions of the dialect landscape. The volume is global in focus, and chapters discuss data gathered in the United States, the United Kingdom, the Republic of Ireland, France, Germany, Austria, and South Korea. The common methods used by many of the contributors means that readers will be able to draw comparisons from the breadth of the volume. The primary focus of this volume is geared toward an examination of dialect perceptions in and of cities, with an additional goal of presenting empirical, theoretical, and methodological advancements in Perceptual Dialectology. Authors' contributions to the collection examine how the urban setting influences perceptions of linguistic variation and, in the course of examining the connections between place and perceptions, explore several interrelated themes of linguistic variation, including the differences in the perception of rural and urban areas, processes of perception and language change, and the relationship between perception and reality.

Studying Dialect

Rob Penhallurick, 2018-02-22 This book provides an accessible yet comprehensive introduction to the study of the dialects of English as they are spoken around the world, from the earliest dialect dictionaries of the sixteenth century to contemporary research emerging from the field of geolinguistics. Organised into ten thematic chapters, it explores and evaluates the methods and purposes of each approach to the study of dialectal variation, with full explanations of technical terms throughout. Illuminating one of the most productive fields of interest in language study, this compelling book is essential reading for students of dialect and regional difference in English.

Urban Matters Arne Ziegler, Stefanie Edler, Georg Oberdorfer, 2021-12-16 The city as a complex

socio cultural structure plays a central role economically administratively as well as culturally Factors such as higher population density a more expansive infrastructure and larger social and cultural diversity compared to rural areas have a substantial impact on urban society and urban communication Focusing on the latter the contributions to this volume discuss the characteristics and dynamics of urban language use considering aspects such as contact variation and change as well as identity indexicality and attitudes but also spatial factors including mobility urbanisation counterurbanisation and diffusion processes The collected articles provide an update of first wave approaches of variationist sociolinguistics but also establish a connection to third wave research for readers from a broad range of fields especially sociolinguistics variationist linguistics and dialectology The book presents modern methodological and conceptual ideas and a wealth of new findings but also serves as a reference work combining theoretical discussions with results from recent empirical studies
