Karen Stote,2025-10-28T00:00:00Z Indigenous Peoples in Canada have experienced coerced sterilization under eugenics legislation since the 1930s and the violence has never stopped even though eugenics fell into disrepute In *The Genocide Continues* Karen Stote traces the historical political economic and policy context informing the coerced sterilization of Indigenous women from 1970 onward She shows how a powerful idea paved the way for the expanded violations of Indigenous People's bodies and futures That idea was population control a concern with who occupied land and how resources were distributed and it was a central thread guiding public health interventions from eugenics to family planning The *Genocide Continues* offers new insights to show how federal provincial and corporate activities intersected to criminalize and regulate Indigenous reproduction Saskatchewan which first established family planning policies in the 1970s and is now the province with the highest number of Indigenous women coming forward with experiences of coerced sterilization is Stote's case study to demonstrate why family planning activities consistently targeted Indigenous women Stote weaves compelling archival evidence with principled storytelling to connect violence against Indigenous bodies to violence against Indigenous lands Unless and until colonialism extractivism and dispossession are addressed a genocide against Indigenous peoples will continue     Looking Back and Living Forward Jennifer Markides,Laura Forsythe,2018-04-16 *Looking Back and Living Forward* Indigenous Research Rising Up brings together research from a diverse group of scholars from a variety of disciplines The work shared in this book is done by and with Indigenous peoples from across Canada and around the world Together the collaborators voices resonate with urgency and insights towards resistance and resurgence The various chapters address historical legacies environmental concerns community needs wisdom teachings legal issues personal journeys educational implications and more In these offerings the contributors share the findings from their literature surveys document analyses community based projects self studies and work with knowledge keepers and elders The

Schramm,2016-12-23 The Gunnar mine mill and town site were built in a remote location in northern Saskatchewan on the shore of Lake Athabasca Like most mining communities the town boomed first with construction workers and miners and later with families When the Gunnar mill construction was completed in the fall of 1955 it doubled Canada s uranium production capacity By 1956 the Gunnar mine was the largest uranium producer in the world The Gunnar town site was built to serve the mine and mill and at one time had a population of about 850 people By 1964 it was a ghost town The Gunnar mine produced over 5 million tonnes of uranium ore nearly 4 4 million tonnes of mine tailings and an estimated 2 710 700 cubic metres of waste rock Following closure in 1964 the Gunnar site was abandoned with little remediation and no reclamation being done It has been referred to as the second greatest environmental disaster area in Canada Forty years would pass before the governments of Saskatchewan and Canada reached an agreement to fund the remediation clean up of the Gunnar site and contracted the management of the project to the Saskatchewan Research Council SRC At the time of writing this book the clean up was well underway with several years of clean up activity remaining and a further expected 10 15 years of monitoring activity before the site is expected to be released into a long term management and monitoring program
