A Practical Guide to Early Childhood Curriculum Claudia Fuhriman Eliason, Loa Thomson Jenkins, 1981

How to Work with Standards in the Early Childhood Classroom

Carol Seefeldt, 2005 More and more teachers of young children are being asked to develop their curriculum according to standards. This essential resource will guide educators as they grapple with a plethora of issues, questions and practices surrounding the use of standards in the early childhood classroom. Carol Seefeldt, well known educator and bestselling author, offers teachers an overview of the standards movement. Describes the status of standards in early education, presents the issues around the design and selection of standards and provides practical strategies for effectively implementing standards with young children, preschool through the early primary grades. This book provides both the background knowledge and a working understanding of standards to help teachers successfully judge and select standards, design appropriate ways of using and working with standards and develop appropriate assessment strategies. Illustrated with children's work, this how-to guide provides practical illustrations of how standards can be used to benefit early childhood classrooms, including many sample activities. Demonstrates how to work with standards in the separate subject areas of the sciences, arts, language and literacy, mathematics and social studies. Offers ideas for including all children, such as those with special needs and those just learning English, and describes a project, Children Study Their Play Yard, illustrating how thematic standards based problem solving learning can be integrated into the total curriculum.
