**Experimental Pragmatics/semantics** Jörg Meibauer, Markus Steinbach, 2011 In recent years a lively debate ensued on an old issue namely the proper distinction between semantics and pragmatics against the background of the classical Gricean distinction between what is said and what is implicated From a linguist's point of view however there has always been a regrettable lack of empirical data in this otherwise sophisticated debate Recently a new strand of research emerged under the name of experimental pragmatics the attempt to gain experimental data on pragmatic and semantic issues by using psycholinguistic and neurolinguistic methods This volume brings together work by scholars engaging in experimental research on the semantics pragmatics distinction The contribution of experimental pragmatics to pragmatic and semantic theory is discussed from a number of different angles ranging from implicature and pragmatic enrichment to pragmatic acquisition pragmatic impairment and pragmatic processing In addition methodological issues are discussed The contributions will appeal to theoretical linguists psycholinguists neurolinguists and language philosophers

**Presuppositions and Cognitive Processes** Filippo Domaneschi, 2016-07-29 This book breaks new ground towards an understanding of the mental processes involved in presupposition the comprehension of information taken for granted Various psycholinguistic experiments are discussed to support the idea that involved in ordinary language comprehension are complex and demanding cognitive processes The author demonstrates that these processes exist not only at the explicit level of an utterance but also at a deeper level of computing where the background information taken for granted as already known and shared between interlocutors is processed The author shows that experimental research can suggest new

theoretical models for presupposition thus this book will be of interest to researchers and students of psycholinguistics the philosophy of language and experimental pragmatics

**The Handbook of Clinical Linguistics** Martin J. **Theory of mind in relation to other cognitive abilities** Ann Dowker, Hiromi Tsuji, Douglas Frye, 2023-02-28

Presupposition and Implicature in Compositional Semantics U. Sauerland, P. Stateva, 2007-05-10 All humans can interpret sentences of their native language quickly and without effort Working from the perspective of generative grammar the contributors to this volume investigate three mental mechanisms widely assumed to underlie this ability compositional semantics implicature computation and presupposition computation

**Alternatives in Grammar and Cognition** Nicole Gotzner, Jesse A. Harris, Richard Breheny, Yael Sharvit, 2025-02-28 This edited book brings together research investigating foundational issues relating to the generation and restriction of alternative sets from theoretical and empirical perspectives It includes contributions from noted scholars in the field to provide theoretical arguments opinionated perspectives synthesizing existing positions and empirical evidence from experimentation and fieldwork in support of a theoretical framework Alternatives have come to occupy a central place in formal semantic theory and are referenced in notable accounts of various phenomena including focus negation implicature modality counterfactuals and contrastive topics

among others More recently experimental investigations have addressed the mental activation and availability of alternatives in sentence comprehension and memory representations finding that alternative meanings are computed during incremental processing and persist in memory after sentence completion for a limited amount of time The diverse perspectives represented in this volume will serve to clarify and guide the major avenues available in future research on the topic and the book will be of interest to graduate students and researchers in fields such as linguistics especially psycholinguistics and experimental pragmatics philosophy and cognitive science

**Semantics and Pragmatics** R. Breheny, Uli

Sauerland, Kazuko Yatsushiro, 2009-10-22 This volume comprises thirteen original research papers and three overview papers presenting new work using a number of experimental techniques from psycho and neurolinguistics in the three key areas of current semantics and pragmatics implicature negation and presupposition

Context, Cognition and Conditionals Chi-Hé

Elder, 2019-06-24 This book proposes a semantic theory of conditionals that can account for i the variability in usages that conditional sentences can be put and ii both conditional sentences of the form if p q and those conditional thoughts that are expressed without using if It presents theoretical arguments as well as empirical evidence from English and other languages in support of the thesis that an adequate study of conditionals has to go beyond an analysis of specific sentence forms or lexical items The resulting perspective on conditionals is one in which conditionality is located at a higher level than that of the sentence namely at the level of thought The author argues that it is only through adopting such a perspective and with it a commitment to context dependent semantics that we can successfully represent conditional utterances as they are used and understood by ordinary language users It will be of interest to students and scholars working on the semantics of conditionals in the fields of linguistics especially semantics and pragmatics and philosophy of language

book length discussion on assertion will appeal to researchers across a number of fields Its general approach presents a critical synthesis of the literature on assertion and is organised to reflect the various concerns that have led authors to consider this previously neglected topic

**Linguistic and Psycholinguistic Approaches on Implicatures and**

**Presuppositions** Salvatore Pistoia-Reda, Filippo Domaneschi, 2017-05-03 This book discusses developments in the study of implicatures and presuppositions drawing on recent linguistic and psycholinguistic literature It provides original discussions of specific formal aspects of the theoretical reconstruction of these phenomena The authors offer innovative experimental analyses in which crucial processing questions are addressed and new experimental methodologies are introduced The result

is an advanced debate featuring broad empirical coverage of the issues as well as an informed discussion of the connections between a Compositional Semantics and a Pragmatic Theory of Implicit Communication in light of the empirical data coming from Experimental Semantics and Pragmatics This book will be a worthwhile read for those with interests in both the formal and methodological aspects of these arguments      **Pragmatics** Noel Burton-Roberts,2007-05-16 Publisher description

Alternative Sets in Language Processing Nicole Gotzner,2017-01-20 This book presents a novel experimental approach to investigating the mental representation of linguistic alternatives Combining theoretical and psycholinguistic questions concerning the nature of alternative sets it sheds new light on the theory of focus and the cognitive mechanisms underlying the processing of alternatives In a series of language comprehension experiments the author shows that intonational focus and focus particles such as only shape the representation of alternatives in a listener s mind in a fundamental way This book is relevant to researchers interested in semantics pragmatics language processing and memory      **Language** George Melville Bolling,Bernard Bloch,2006
