**Cli-Fi and Class** Debra J. Rosenthal, Jason de Lara Molesky, 2023-10-09 Since its emergence in the late twentieth century climate fiction or cli fi has concerned itself as much with economic injustice and popular revolt as with rising seas and soaring temperatures. Indeed with its insistent focus on redressing social disparities cli fi might reasonably be classified as a form of protest literature. As environmental crises escalate and inequality intensifies literary writers and scholars alike have increasingly scrutinized the dual exploitations of the earth's ecosystems and the socioeconomically disadvantaged. Cli Fi and Class focuses on the representation of class dynamics in climate change narratives. With fifteen essays on the intersection of the economic and the ecological addressing works ranging from the novels of Joseph Conrad, Cormac McCarthy and Octavia Butler to the film Black Panther and the Broadway musical Hadestown this collection unpacks the complex ways economic exploitation impacts planetary well being and the ways climatic change shapes those inequities in turn.

*The Routledge Handbook of Fiction and Belief* Alison James, Akihiro Kubo, Françoise Lavocat, 2023-12-22 The Routledge Handbook of Fiction and Belief offers a fresh reevaluation of the relationship between fiction and belief surveying key debates and perspectives from a range of disciplines including narrative and cultural studies, science, religion and politics. This volume draws on global cutting edge research and theory to investigate the historically variable understandings of fictionality and allows readers to grasp the role of fictions in our understanding of the world. This interdisciplinary approach provides a thorough introduction to the fundamental themes of Theoretical and Philosophical Perspectives on Fiction, Fiction Fact and Science, Social Effects and Uses of Fiction, Fiction and Politics, Fiction and Religion. Questioning how fictions in fact shape mediate or distort our beliefs about the real world, essays in this volume outline the state of theoretical debates from the perspectives of literary theory, philosophy, sociology, religious studies, history and the cognitive sciences. It aims to take stock of the real or supposed effects that fiction has on the world and to offer a wide reaching reflection on the implications of belief in fictions in the so-called post truth era.

**14th Storm: A thriller-like dystopian cli-fi novel set in 2043** Daniel J Mooney, 2025-07-10 In 2043 the climate has finally changed. The planet is ravaged by violent storms and failing crops and much of the world is now uninhabitable. Amidst a world of hungry and desperate people the Department of Environmental Justice has been tasked with finding and executing those who have denied climate change. On the eve of the 14th storm Broderick and Malley are asked to hunt the leader of a stirring rebellion but something feels wrong. Broderick is shut off and interested only in exacting revenge. Malley is sceptical and thinks their latest target is more politically motivated than their employer. Their journey is upended by Fionnuala a young and idealistic runaway who is hopeful for the future and desperate to save the target. Together the three of them must learn to adapt to the climate and the polarised groups if they are to survive. Rarely have I seen satire and dystopian literature combined to such compelling effect. Jack Fennell Daniel J Mooney is an Irish author. Inspired by current events and global voices his debut *Me Myself and Them* was published in 2017 followed by *The Great Unexpected* in 2018.

*Our Shared Storm* Andrew Dana Hudson, 2022-04-05 Through speculative fiction five interlocking novelettes explore the possible realities of our climate future. What is the future of our climate? Given that our summers now regularly feature Arctic heat waves and wildfire blood skies polar vortex winters that reach all the way down to Texas and 100 year storms that hit every few months it may seem that catastrophe is a done deal. As grim as things are however we still have options. Combining fiction and nonfiction and employing speculative tools for scholarly purposes *Our Shared Storm* explores not just one potential climate future but five possible outcomes dependent upon our actions today. Written by speculative fiction writer and sustainability researcher Andrew Dana Hudson *Our Shared Storm* features five overlapping fictions to employ a futurist technique called scenarios thinking. Rather than try to predict how history will unfold picking one out of many unpredictable and contingent branching paths it instead creates a set of futures that represent major trends or counterposed possibilities based on a set of climate modeling scenarios known as the Shared Socioeconomic Pathways SSPs. The setting is the year 2054 during the Conference of the Parties global climate negotiations a.k.a. The COP in Buenos Aires Argentina. Each story features a common cast of characters but with events unfolding differently for them and human society in each alternate universe. These five scenarios highlight the political economic and cultural possibilities of futures where investments in climate adaptation and mitigation promised today have been successfully completed kicked down the road or abandoned altogether. From harrowing to hopeful these stories highlight the choices we must make to stabilize the planet. *Our Shared Storm* is an experiment in deploying practice based research methods to explore the opportunities and challenges of using climate fiction to engage scientific and academic frameworks.
