How does coding change the way we think about architecture? This question opens up an important research perspective. In this book Miro Roman and his AI Alice_ch3n81

develop a playful scenario in which they propose coding as the new literacy of information. They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books. Focusing on the intersection of information technology and architectural formulation, the authors create an evolving intellectual reflection on digital architecture and computer science. Science Fiction, Fantasy, and Horror Film Sequels, Series, and Remakes Kim R. Holston, Tom Winchester, 1997. Science fiction, fantasy, and horror films have spawned more sequels than any other film genre. While the perhaps overly familiar Dracula and Frankenstein have inspired dozens of additional films, such movies as Quatermass and The Omen have also produced several sequels. Over 400 horror, science fiction, and fantasy films are analyzed in this comprehensive reference to the genre's sequels, series, and remakes. Filmographies are given for each film, providing year of release, studio, running time, cast, and credits. This is followed by a plot synopsis, reviews of the work, and a critical analysis.
