Spanish Poetry of the Twentieth Century Andrew Debicki, 2014-10-17 Twentieth century Spanish poetry has received comparatively little attention from critics writing in English Andrew Debicki now presents the first English language history published in the United States to examine the sweep of modern Spanish verse More important he is the first to situate Spanish poetry in the context of European modernity to trace its trajectory from the symbolists to the postmodernists Avoiding the rigid generational schemes and catalogs of names found in traditional Hispanic literary histories Debicki offers detailed discussions of salient books and texts to construct an original and compelling view of his subject He demonstrates that contemporary Spanish verse is rooted in the modern tradition and poetics that see the text as a unique embodiment of complex experiences He then traces the evolution of that tradition in the early decades of the century and its gradual disintegration from the 1950s to the present as Spanish poetry came to reflect features of the postmodern especially the poetics of text as process rather than as product By centering his study on major periods and examining within each the work of poets of different ages Debicki develops novel perspectives The late 1960s and early 1970s for example were not merely the setting for a new aestheticist generation but an era of exceptional creativity in which both established and new writers engendered a profound intertextual and often self referential lyricism This book will be essential reading for specialists in modern Spanish letters for advanced students and for readers interested in comparative literature Hold That Pose: Visual Culture in the Late Nineteenth-Century Spanish Periodical, 2008 *New Serial Titles*, 1993 A union list of serials commencing publication after Dec 31 1949 The Americans: Reconstruction Through the 20th Century Holt

Among the many consequences of Spain's annexation of Portugal from 1580 to 1640 was an increase in the number of Portuguese authors writing in Spanish One can trace this practice as far back as the medieval period although it was through Gil Vicente Jorge de Montemayor and others that Spanish language texts entered the mainstream of literary expression in Portugal Proficiency in both languages gave Portuguese authors increased mobility throughout the empire For those with literary aspirations Spanish offered more opportunities to publish and greater readership which may be why it is nearly impossible to find a Portuguese author who did not participate in this trend during the dual monarchy Over the centuries these authors and their works have been erroneously defined in terms of economic opportunism questions of language loyalty and other reductive categories Within this large group however is a subcategory of authors who used their writings in Spanish to imagine explore and celebrate their Portuguese heritage Manuel de Faria e Sousa ngela de Azevedo Jacinto Cordeiro Ant nio de Sousa de Macedo and Violante do C u among many others offer a uniform yet complex answer to what it means to be from Portugal constructing and claiming their Portuguese identity from within a Castilianized existence Whereas all texts produced in Iberia during the early modern period reflect the distinct social political and cultural realities sweeping across the peninsula to some degree Portuguese literature written in Spanish offers a unique vantage point from which to see these converging landscapes Being Portuguese in Spanish explores the cultural cross pollination that defined the era and reappraises a body of works that uniquely addresses the intersection of language literature politics and identity      An Anthology of Spanish American Literature International Institute of Ibero-American Literature,1968      **Encyclopedia of World Literature in the 20th Century: E-K** Wolfgang Bernard Fleischmann,Frederick Ungar,Lina Mainiero,1969 Library has v 1 3 only      National Union Catalog ,1980      *Century 2.
