

El Llano en llamas

Tan dura como las sensaciones que provoca un cuento plagado de muerte, desolación y devastación humana. El lector puede quedarse con el amargo sabor de una vida que no vale nada, la soledad de la ignorancia y la miseria moral de seres que, como fantasmas anclados en un limbo, no conocen más que la venganza y su eterna condena a luchar por una causa que saben perdida. Pero afortunadamente esto no es todo lo que deja una obra escrita tan magistralmente como lo es El Llano en llamas. De igual modo que en Pedro Páramo, se siente en ella el destello de las imágenes tan vivas, la música del silencio y la naturaleza implacable sirviendo como marco a los personajes que prolongan su vida , suplicando comprensión, mientras dure su relato.

En el Llano en llamas la realidad era la lucha contra las tropas de los federales, un oponente enorme que los arrasaba, la meta era hacer justicia por medio de la injusticia, de hacer más daño que los que les hacen daño, ser más malvados. En un cruento ataque al sistema que los excluye, al perseguir su meta los «buenos» caían en abusos, matanza y destrucción. Esta no es la historia de los vencedores, es la perspectiva de los de abajo, de los que se jugaron la vida porque no tenían nada que perder, y aun así fueron derrotados, de quien ha sufrido humillación y abuso, que aún vive, pero con resentimiento y desconfianza. O simplemente una elección.

Todo ser humano elige, incluso elige no elegir. Hoy los perritos son todos aquellos que por alguna razón están fuera del sistema y buscan su lugar. Pero como he dicho, la única respuesta posible es siempre una elección. El hombre tiene la obligación de elegir, ya sea elegir el amor a la vida, la construcción, o el amor a la muerte, o destrucción.

El proceso de vivir productivamente implica crear, en cualquiera de sus formas, la actividad que más llena al ser humano. Crear vida es una de sus formas, crear arte, crear trabajo, crear amor, crear

El Yangtze En Llamas:

Historia de la tecnología militar y la pólvora Daniel Mikelsten, La tecnología militar a menudo es investigada y desarrollada por científicos e ingenieros específicamente para su uso en la batalla por las fuerzas armadas. Muchas nuevas tecnologías surgieron como resultado de la financiación militar de la ciencia. La ingeniería de armamento es el diseño, desarrollo, prueba y gestión del ciclo de vida de armas y sistemas militares. Se basa en el conocimiento de varias disciplinas tradicionales de la ingeniería incluida la ingeniería mecánica, la ingeniería eléctrica, la mecánica, la electrónica, la ingeniería aeroespacial, la ingeniería de materiales y la ingeniería química. Contenido: Armamento nativo americano, armas de impacto, armas cortantes, armas perforantes, armas defensivas, armas simbólicas, tecnología militar, tecnología posmoderna, ciencia y tecnología militar antes de la era moderna, Primera Guerra Mundial y años de entreguerras, Segunda Guerra Mundial, Frío americano, Ciencia de guerra, La pólvora, Gunpowder Empires, Ingeniería civil, Estados Unidos de América. *Historia de las armas y la tecnología militar desde sus inicios* Peter Skalfist, Daniel Mikelsten, Vasil Teigens, Se ha observado el uso de objetos como armas entre los chimpancés lo que ha llevado a la especulación de que los primeros humanos usaban armas desde hace cinco millones de años. Sin embargo, esto no se puede confirmar con evidencia física porque palos de madera, lanzas y piedras sin forma habrían dejado un registro ambiguo. Las primeras armas inequívocas que se han encontrado son las lanzas Schöningenhe, ocho lanzas de madera que se remontan a más de 300 000 años. Las primeras armas antiguas fueron mejoras evolutivas de los implementos neolíticos, tardos pero las mejoras significativas en los materiales y las técnicas de fabricación llevaron a una serie de revoluciones en la tecnología militar. Durante la Edad del Bronce también aparecieron las primeras estructuras defensivas lo que indica una mayor necesidad de seguridad. El desarrollo del trabajo del hierro alrededor del 1300 a.C. En Grecia tuvo un impacto importante en el desarrollo de armas antiguas. Sin embargo, no fue la introducción de las primeras espadas de la Edad del Hierro ya que no eran superiores a sus predecesoras de bronce sino la domesticación del caballo y el uso generalizado de ruedas de radios por c. 2000 AC. Esto llevó a la creación del carro ligero tirado por caballos, cuya movilidad mejorada resultó importante durante esta época. 1938- 1939 DIA A DIA Ruben Ygua, 2025-09-15. En el transcurso de la Historia la opinión pública siempre ha sido manipulada. Para mantenernos informados dependemos de organismos especializados, raramente independientes, subordinados al poder económico o ideológico, políticas moldeando la opinión del ciudadano común a respecto de todos los asuntos de su interés. En la primera mitad del siglo XX ese papel informativo era desempeñado por la prensa escrita, la radio, la literatura y el cine, todos ellos controlados de alguna forma por partidos políticos o bajo la influencia del poder económico de agrupaciones generalmente anónimas. Por todo eso podemos afirmar que la historia de la Segunda Guerra Mundial aún no ha sido narrada de forma imparcial, siempre fue escrita por los vencedores, los Buenos que impusieron su versión en las páginas oficiales de la Historia, orgullosos de haber derrotado a los Malos. Diversas razones han influenciado para que eso suceda, el tiempo transcurrido todavía no fue suficiente para
